Births, Deaths, and Marriages

IN THE

Principal Towns of Scotland

*By Authority of the Registrar-General**Crown Copyright Reserved.*

No. 1. Week ending SATURDAY, JANUARY 6, 1934. Price 2d. net.

During the week ending 6th January 1934, there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,505,600, the births of 909 living children, the deaths of 757 persons, and 1341 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 686. The equivalent annual birth-rate is 18·9 per thousand, the marriage-rate 27·9, and the death-rate (corrected) 14·3.

The birth-rate of the week is 0·6 more than in the previous week, but 1·8 below the average. The marriage-rate is 9·9 more than in the previous week, and 4·0 above the average. The death-rate is 1·1 less than in the previous week, and 3·0 below the average.

The weekly death-rates in the individual towns varied from 19·6 in Ayr and 17·6 in Kirkcaldy, to 7·7 in Paisley and 9·2 in Greenock. Relatively high death-rates occurred in Edinburgh (17·0), in Glasgow (14·6), and in Dunfermline (14·5).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 30, and are 5 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·6 per thousand. They include none from typhoid fever, none from measles, 3 from scarlet fever, 5 from whooping-cough, 6 from diphtheria, 7 from influenza, 3 from cerebro-spinal fever, and 6 from other epidemic diseases, all of which were ascribed to erysipelas. Compared with the number in the previous week, deaths from whooping-cough are 1 more, and from diphtheria 1 more, but those from scarlet fever number the same, while from cerebro-spinal fever they are 1 fewer, from influenza 3 fewer, and from other epidemic diseases 3 fewer.

Deaths from respiratory diseases numbered 150, and equalled an annual death-rate from these causes of 3·1 per thousand. This death-rate is the same as in the previous week, but is 0·9 below the average.

Deaths of children of less than one year old numbered 86, and those of persons of sixty-five and upwards 280. The former are 16 fewer than in the previous week, and the latter are 32 fewer.

Deaths attributed to violent causes numbered 28, and are 1 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 42°·7, being 2°·6 above that for the previous week, and 0°·5 above that for the corresponding week of last year. The mean rainfall was 1·08 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

WEEKLY RETURN

OF

Births, Deaths, and Marriages

IN THE

Principal Towns of Scotland

*By Authority of the Registrar-General**Crown Copyright Reserved.***No. 2. Week ending SATURDAY, JANUARY 13, 1934. Price 2d. net.**

During the week ending 13th January 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,505,600, the births of 973 living children, the deaths of 698 persons, and 257 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 656. The equivalent annual birth-rate is 20·2 per thousand, the marriage-rate 5·3, and the death-rate (corrected) 13·7.

The birth-rate of the week is 1·3 more than in the previous week, and 0·1 above the average. The marriage-rate is 22·6 less than in the previous week, and 0·8 below the average. The death-rate is 0·6 less than in the previous week, and 4·5 below the average, or 3·1 below if the abnormal rate of 24·1 in 1929 be excluded.

The weekly death-rates in the individual towns varied from 21·7 in Dunfermline, and 17·6 in Kirkealdy and in Hamilton, to 8·3 in Coatbridge and 9·8 in Falkirk. Relatively high death-rates occurred in Paisley (16·5), in Perth (16·2), in Dundee (15·9), in Ayr (15·4), in Aberdeen (15·3), in Clydebank (15·0), and in Kilmarnock (14·9).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 29, and are 1 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·6 per thousand. They include none from typhoid fever, none from measles, 4 from scarlet fever, 2 from whooping-cough, 6 from diphtheria, 5 from influenza, 3 from cerebro-spinal fever, and 9 from other epidemic diseases, of which 8 were ascribed to erysipelas and 1 to dysentery. Compared with the number in the previous week, deaths from other epidemic diseases are 3 more, and from scarlet fever 1 more, but those from diphtheria and from cerebro-spinal fever each number the same, while from influenza they are 2 fewer, and from whooping-cough 3 fewer.

Deaths from respiratory diseases numbered 126, and equalled an annual death-rate from these causes of 2·6 per thousand. This death-rate is 0·5 less than in the previous week, and is 2·1 below the average, or 1·1 below if the abnormal rate of 8·5 in 1929 be excluded.

Deaths of children of less than one year old numbered 60, and those of persons of sixty-five and upwards 280. The former are 26 fewer than in the previous week, but the latter number the same as in that week.

Deaths attributed to violent causes numbered 26, and are 2 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 43°·2, being 0°·5 above that for the previous week, and 3°·1 above that for the corresponding week of last year. The mean rainfall was 1·77 inches.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

No. 3. Week ending SATURDAY, JANUARY 20, 1934. Price 2d. net.

During the week ending 20th January 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,505,600, the births of 914 living children, the deaths of 743 persons, and 214 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 689. The equivalent annual birth-rate is 19·0 per thousand, the marriage-rate 4·5, and the death-rate (corrected) 14·3.

The birth-rate of the week is 1·2 less than in the previous week, and 1·1 below the average. The marriage-rate is 0·8 less than in the previous week, but 0·2 above the average. The death-rate is 0·6 more than in the previous week, but 5·0 below the average, or 2·0 below if the abnormal rate of 31·5 in 1929 be excluded.

The weekly death-rates in the individual towns varied from 23·7 in Falkirk and 22·4 in Ayr, to 5·8 in Dunfermline and 8·1 in Kilmarnock. Relatively high death-rates occurred in Kirkcaldy (18·8), in Paisley (17·1), in Motherwell and Wishaw (16·6), in Dundee (15·3), and in Aberdeen (15·3).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 27, and are 2 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·6 per thousand. They include 1 from typhoid fever, 2 from measles, 7 from scarlet fever, 4 from whooping-cough, 9 from diphtheria, 2 from influenza, 1 from cerebro-spinal fever, and 1 from lethargic encephalitis. Compared with the number in the previous week, deaths from scarlet fever are 3 more, from diphtheria 3 more, from measles 2 more, from whooping-cough 2 more, and from typhoid fever 1 more, but those from cerebro-spinal fever are 2 fewer, from influenza 3 fewer, and from other epidemic diseases 8 fewer.

Deaths from respiratory diseases numbered 114, and equalled an annual death-rate from these causes of 2·4 per thousand. This death-rate is 0·2 less than in the previous week and is 2·6 below the average, or 1·0 below if the abnormal rate of 11·7 in 1929 be excluded.

Deaths of children of less than one year old numbered 91, and those of persons of sixty-five and upwards 268. The former are 31 more than in the previous week, but the latter are 12 fewer.

Deaths attributed to violent causes numbered 26, and are the same as in the previous week.

The mean temperature for seven of the towns named in the Table was 40°·3, being 3°·1 below that for the previous week, but 8°·1 above that for the corresponding week of last year. The mean rainfall was 1·00 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

No. 4. Week ending SATURDAY, JANUARY 27, 1934. Price 2d. net.

During the week ending 27th January 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,505,600, the births of 886 living children, the deaths of 695 persons, and 254 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 629. The equivalent annual birth-rate is 18·4 per thousand, the marriage-rate 5·3, and the death-rate (corrected) 13·1.

The birth-rate of the week is 0·6 less than in the previous week, and 1·9 below the average. The marriage-rate is 0·8 more than in the previous week, and 0·3 above the average. The death-rate is 1·2 less than in the previous week, and 7·7 below the average, or 3·3 below if the abnormal rate of 38·4 in 1929 be excluded.

The weekly death-rates in the individual towns varied from 17·3 in Dunfermline, and 15·9 in Dundee and in Aberdeen, to 6·4 in Clydebank and 7·1 in Kirkcaldy. Relatively high death-rates occurred in Hamilton (14·9), in Edinburgh (14·2), and in Paisley (13·6).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 31, and are 4 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·6 per thousand. They include none from typhoid fever, 2 from measles, 1 from scarlet fever, 2 from whooping-cough, 7 from diphtheria, 11 from influenza, 3 from cerebro-spinal fever, and 5 from other epidemic diseases, of which 3 were ascribed to erysipelas, 1 to lethargic encephalitis and 1 to dysentery. Compared with the number in the previous week, deaths from influenza are 9 more, from other epidemic diseases 4 more, and from cerebro-spinal fever 2 more, but those from measles number the same, while from whooping-cough they are 2 fewer, from diphtheria 2 fewer, and from scarlet fever 6 fewer.

Deaths from respiratory diseases numbered 108, and equalled an annual death-rate from these causes of 2·2 per thousand. This death-rate is 0·2 less than in the previous week, and is 3·6 below the average, or 1·2 below if the abnormal rate of 15·4 in 1929 be excluded.

Deaths of children of less than one year old numbered 89, and those of persons of sixty-five and upwards 251. The former are 2 fewer than in the previous week, and the latter are 17 fewer.

Deaths attributed to violent causes numbered 24, and are 2 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 41·4, being 1·1 above that for the previous week, and 10·1 above that for the corresponding week of last year. The mean rainfall was 0·28 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

OF

Births, Deaths, and Marriages

IN THE

Principal Towns of Scotland

*By Authority of the Registrar-General**Crown Copyright Reserved.***No. 5. Week ending SATURDAY, FEBRUARY 3, 1934. Price 2d. net.**

During the week ending 3rd February 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,505,600, the births of 932 living children, the deaths of 775 persons, and 379 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 711. The equivalent annual birth-rate is 19·4 per thousand, the marriage-rate 7·9, and the death-rate (corrected) 14·8.

The birth-rate of the week is 1·0 more than in the previous week, but 0·8 below the average. The marriage-rate is 2·6 more than in the previous week, and 1·7 above the average. The death-rate is 1·7 more than in the previous week, but 6·9 below the average, or 2·8 below if the abnormal rate of 37·9 in 1929 be excluded.

The weekly death-rates in the individual towns varied from 22·2 in Perth, and 18·2 in Ayr and in Falkirk, to 5·4 in Clydebank, and 10·1 in Dunfermline. Relatively high death-rates occurred in Paisley (17·7), in Greenock (17·7), in Kirkcaldy (17·6), in Edinburgh (16·2), in Kilmarnock (16·2), and in Glasgow (15·0).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 34, and are 3 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·7 per thousand. They include none from typhoid fever, 2 from measles, 6 from scarlet fever, 2 from whooping-cough, 5 from diphtheria, 10 from influenza, 4 from cerebro-spinal fever, and 5 from other epidemic diseases, of which 3 were ascribed to erysipelas and 2 to lethargic encephalitis. Compared with the number in the previous week, deaths from scarlet fever are 5 more and from cerebro-spinal fever 1 more, but those from measles, from whooping-cough and from other epidemic diseases each number the same, while from influenza they are 1 fewer and from diphtheria 2 fewer.

Deaths from respiratory diseases numbered 103, and equalled an annual death-rate from these causes of 2·1 per thousand. This death-rate is 0·1 less than in the previous week, and is 3·8 below the average, or 1·6 below if the abnormal rate of 14·5 in 1929 be excluded.

Deaths of children of less than one year old numbered 79, and those of persons of sixty-five and upwards 289. The former are 10 fewer than in the previous week, but the latter are 38 more.

Deaths attributed to violent causes numbered 33, and are 9 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 40°·1, being 1°·3 below that for the previous week, but 2°·0 above that for the corresponding week of last year. The mean rainfall was 0·11 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

No. 6. Week ending SATURDAY, FEBRUARY 10, 1934. Price 2d. net.

During the week ending 10th February 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,505,600, the births of 887 living children, the deaths of 724 persons, and 302 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 662. The equivalent annual birth-rate is 18·5 per thousand, the marriage-rate 6·3, and the death-rate (corrected) 13·8.

The birth-rate of the week is 0·9 less than in the previous week, and 1·7 below the average. The marriage-rate is 1·6 less than in the previous week, but 0·6 above the average. The death-rate is 1·0 less than in the previous week, and 5·3 below the average, or 2·9 below if the abnormal rate of 28·3 in 1929 be excluded.

The weekly death-rates in the individual towns varied from 19·2 in Perth and 18·2 in Falkirk, to 6·8 in Hamilton and 7·1 in Paisley. Relatively high death-rates occurred in Kirkcaldy (15·3), in Kilmarnock (14·9), in Dunfermline (14·5), in Glasgow (14·4), in Dundee (14·4), in Edinburgh (14·3), in Coatbridge (14·3), and in Ayr (14·0).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 34, and are the same as in the previous week. These deaths equal an annual death-rate from these causes of 0·7 per thousand. They include none from typhoid fever, 1 from measles, 4 from scarlet fever, 7 from whooping-cough, 6 from diphtheria, 8 from influenza, 5 from cerebro-spinal fever, and 3 from other epidemic diseases, of which 2 were ascribed to erysipelas and 1 to acute poliomyelitis. Compared with the number in the previous week, deaths from whooping-cough are 5 more, from diphtheria 1 more, and from cerebro-spinal fever 1 more, but those from measles are 1 fewer, from scarlet fever 2 fewer, from influenza 2 fewer, and from other epidemic diseases 2 fewer.

Deaths from respiratory diseases numbered 126, and equalled an annual death-rate from these causes of 2·6 per thousand. This death-rate is 0·5 more than in the previous week, but is 2·2 below the average, or 1·0 below if the abnormal rate of 9·7 in 1929 be excluded.

Deaths of children of less than one year old numbered 93, and those of persons of sixty-five and upwards 265. The former are 14 more than in the previous week, but the latter are 24 fewer.

Deaths attributed to violent causes numbered 19, and are 14 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 44°·4, being 4°·3 above that for the previous week, and 0°·4 above that for the corresponding week of last year. The mean rainfall was 0·22 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

No. 7. Week ending SATURDAY, FEBRUARY 17, 1934. Price 2d. net.

During the week ending 17th February 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 979 living children, the deaths of 752 persons, and 318 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 710. The equivalent annual birth-rate is 20·3 per thousand, the marriage-rate 6·6, and the death-rate (corrected) 14·7.

The birth-rate of the week is 1·9 more than in the previous week, and 0·5 above the average. The marriage-rate is 0·3 more than in the previous week, and 1·5 above the average. The death-rate is 1·0 more than in the previous week, but 3·8 below the average, or 2·4 below if the abnormal rate of 24·1 in 1929 be excluded.

The weekly death-rates in the individual towns varied from 21·1 in Ayr and 18·0 in Falkirk, to 4·3 in Dunfermline and 6·7 in Kilmarnock. Relatively high death-rates occurred in Paisley (17·7), in Coatbridge (15·5), in Glasgow (15·4), in Aberdeen (15·1), and in Clydebank (15·0).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 36, and are 2 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·7 per thousand. They include none from typhoid fever, 1 from measles, 5 from scarlet fever, 5 from whooping-cough, 11 from diphtheria, 4 from influenza, 5 from cerebro-spinal fever, and 5 from other epidemic diseases, of which 3 were ascribed to erysipelas and 2 to lethargic encephalitis. Compared with the number in the previous week, deaths from diphtheria are 5 more, from other epidemic diseases 2 more, and from scarlet fever 1 more, but those from measles and from cerebro-spinal fever each number the same, while from whooping-cough they are 2 fewer, and from influenza 4 fewer.

Deaths from respiratory diseases numbered 147, and equalled an annual death-rate from these causes of 3·0 per thousand. This death-rate is 0·4 more than in the previous week, but is 1·5 below the average, or 0·9 below if the abnormal rate of 6·8 in 1929 be excluded.

Deaths of children of less than one year old numbered 112, and those of persons of sixty-five and upwards 256. The former are 19 more than in the previous week, but the latter are 9 fewer.

Deaths attributed to violent causes numbered 27, and are 8 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 43°·3, being 1°·1 below that for the previous week, but 4°·5 above that for the corresponding week of last year. The mean rainfall was 0·01 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

WEEKLY RETURN

OF

Births, Deaths, and Marriages

IN THE

Principal Towns of Scotland

*By Authority of the Registrar-General**Crown Copyright Reserved.***No. 8. Week ending SATURDAY, FEBRUARY 24, 1934. Price 2d. net.**

During the week ending 24th February 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 878 living children, the deaths of 756 persons, and 254 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 716. The equivalent annual birth-rate is 18·2 per thousand, the marriage-rate 5·3, and the death-rate (corrected) 14·8.

The birth-rate of the week is 2·1 less than in the previous week, and 2·0 below the average. The marriage-rate is 1·3 less than in the previous week, and 0·2 below the average. The death-rate is 0·1 more than in the previous week, and 4·4 below the average, or 3·4 below if the abnormal rate of 23·3 in 1929 be excluded.

The weekly death-rates in the individual towns varied from 22·6 in Coatbridge and 20·8 in Kirkcaldy, to 8·8 in Perth, and 9·4 in Kilmarnock. Relatively high death-rates occurred in Falkirk (19·3), in Hamilton (19·2), in Dunfermline (18·7), in Ayr (16·9), in Dundee (16·2), and in Glasgow (15·2).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 24, and are 12 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·5 per thousand. They include none from typhoid fever, 1 from measles, 5 from scarlet fever, 3 from whooping-cough, 3 from diphtheria, 3 from influenza, 3 from cerebro-spinal fever, and 6 from other epidemic diseases, of which 3 were ascribed to dysentery, 2 to erysipelas, and 1 to lethargic encephalitis. Compared with the number in the previous week, deaths from other epidemic diseases are 1 more, but those from measles and scarlet fever each number the same, while from influenza they are 1 fewer, from whooping-cough 2 fewer, from cerebro-spinal fever 2 fewer, and from diphtheria 8 fewer.

Deaths from respiratory diseases numbered 146, and equalled an annual death-rate from these causes of 3·0 per thousand. This death-rate is the same as in the previous week, but is 1·7 below the average, or 1·3 below if the abnormal rate of 6·4 in 1929 be excluded.

Deaths of persons of less than one year old numbered 114, and those of persons of sixty-five and upwards 242. The former are 2 more than in the previous week, but the latter are 14 fewer.

Deaths attributed to violent causes numbered 38, and are 11 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 45°·3, being 2°·0 above that for the previous week, and 10°·8 above that for the corresponding week of last year. The mean rainfall was 0·09 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

WEEKLY RETURN

OF

Births, Deaths, and Marriages

IN THE

Principal Towns of Scotland

By Authority of the Registrar-General

Crown Copyright Reserved.

No. 9. **Week ending SATURDAY, MARCH 3, 1934.** **Price 2d. net.**

During the week ending 3rd March 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 910 living children, the deaths of 764 persons, and 340 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 696. The equivalent annual birth-rate is 18·9 per thousand, the marriage-rate 7·0, and the death-rate (corrected) 14·4.

The birth-rate of the week is 0·7 more than in the previous week, but 1·1 below the average. The marriage-rate is 1·7 more than in the previous week, and 0·1 above the average. The death-rate is 0·4 less than in the previous week, and 3·7 below the average.

The weekly death-rates in the individual towns varied from 22·5 in Ayr, 16·6 in Coatbridge and 16·6 in Falkirk, to 4·1 in Hamilton, and 10·7 in Clydebank. Relatively high death-rates occurred in Greenock (16·4), in Motherwell and Wishaw (16·4), in Dunfermline (15·8), in Glasgow (15·0), and in Kilmarnock (14·8).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 31, and are 7 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·6 per thousand. They include none from typhoid fever, 6 from measles, 6 from scarlet fever, 6 from whooping-cough, 4 from diphtheria, 5 from influenza, 2 from cerebro-spinal fever, and 2 from other epidemic diseases, both of which were ascribed to erysipelas. Compared with the number in the previous week, deaths from measles are 5 more, from whooping-cough 3 more, from influenza 2 more, from scarlet fever 1 more, and from diphtheria 1 more, but those from cerebro-spinal fever are 1 fewer, and from other epidemic diseases 4 fewer.

Deaths from respiratory diseases numbered 139, and equalled an annual death-rate from these causes of 2·9 per thousand. This death-rate is 0·1 less than in the previous week and is 1·5 below the average.

Deaths of children of less than one year old numbered 116, and those of persons of sixty-five and upwards 256. The former are 2 more than in the previous week, and the latter are 14 more.

Deaths attributed to violent causes numbered 32, and are 6 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 38°·1, being 7°·2 below that for the previous week, and 2°·0 below that for the corresponding week of last year. The mean rainfall was 0·44 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

No. 10. Week ending SATURDAY, MARCH 10, 1934. Price 2d. net.

During the week ending 10th March 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 905 living children, the deaths of 797 persons, and 291 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 751. The equivalent annual birth-rate is 18·7 per thousand, the marriage-rate 6·0, and the death-rate (corrected) 15·6.

The birth-rate of the week is 0·2 less than in the previous week, and 1·8 below the average. The marriage-rate is 1·0 less than in the previous week, but 0·2 above the average. The death-rate is 1·2 more than in the previous week, but 2·6 below the average.

The weekly death-rates in the individual towns varied from 24·9 in Falkirk and 22·0 in Kirkcaldy, to 9·6 in Clydebank and 11·2 in Dundee. Relatively high death-rates occurred in Ayr (21·1), in Hamilton (20·6), in Perth (20·6), in Dunfermline (18·7), in Paisley (18·3), and in Aberdeen (16·0).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 37, and are 6 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·8 per thousand. They include none from typhoid fever, 6 from measles, 3 from scarlet fever, 4 from whooping-cough, 8 from diphtheria, 8 from influenza, 3 from cerebro-spinal fever, and 5 from other epidemic diseases, all of which were ascribed to erysipelas. Compared with the number in the previous week, deaths from diphtheria are 4 more, from influenza 3 more, from other epidemic diseases 3 more, and from cerebro-spinal fever 1 more, but those from measles number the same, while from whooping-cough they are 2 fewer, and from scarlet fever 3 fewer.

Deaths from respiratory diseases numbered 125, and equalled an annual death-rate from these causes of 2·6 per thousand. This death-rate is 0·3 less than in the previous week and is 1·5 below the average.

Deaths of children of less than one year old numbered 97, and those of persons of sixty-five and upwards 280. The former are 19 fewer than in the previous week, but the latter are 24 more.

Deaths attributed to violent causes numbered 34, and are 2 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 39°·4, being 1°·3 above that for the previous week, but 5°·3 below that for the corresponding week of last year. The mean rainfall was 0·80 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

No. 11. Week ending SATURDAY, MARCH 17, 1934. Price 2d. net.

During the week ending 17th March 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 942 living children, the deaths of 781 persons, and 236 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 718. The equivalent annual birth-rate is 19·5 per thousand, the marriage-rate 4·9, and the death-rate (corrected) 14·9.

The birth-rate of the week is 0·8 more than in the previous week, but 1·0 below the average. The marriage-rate is 1·1 less than in the previous week, but 0·1 above the average. The death-rate is 0·7 less than in the previous week, and 2·5 below the average.

The weekly death-rates in the individual towns varied from 21·9 in Hamilton and 21·1 in Ayr, to 9·2 in Greenock and 11·5 in Dunfermline. Relatively high death-rates occurred in Coatbridge (20·2), in Kirkealdy (16·2), in Perth (16·2), in Clydebank (16·1), in Dundee (15·9), in Edinburgh (15·6), and in Glasgow (15·0).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 37, and are the same as in the previous week. These deaths equal an annual death-rate from these causes of 0·8 per thousand. They include none from typhoid fever, 7 from measles, 5 from scarlet fever, 2 from whooping-cough, 5 from diphtheria, 10 from influenza, 5 from cerebro-spinal fever, and 3 from other epidemic diseases, all of which were ascribed to erysipelas. Compared with the number in the previous week, deaths from scarlet fever are 2 more, from influenza 2 more, from cerebro-spinal fever 2 more, and from measles 1 more, but those from whooping-cough are 2 fewer, from other epidemic diseases 2 fewer, and from diphtheria 3 fewer.

Deaths from respiratory diseases numbered 140, and equalled an annual death-rate from these causes of 2·9 per thousand. This death-rate is 0·3 more than in the previous week but is 1·2 below the average.

Deaths of children of less than one year old numbered 108, and those of persons of sixty-five and upwards 300. The former are 11 more than in the previous week, and the latter are 20 more.

Deaths attributed to violent causes numbered 17, and are 17 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 37°·7, being 1°·7 below that for the previous week, and 5°·7 below that for the corresponding week of last year. The mean rainfall was 1·27 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

WEEKLY RETURN

OF

Births, Deaths, and Marriages

IN THE

Principal Towns of Scotland

*By Authority of the Registrar-General**Crown Copyright Reserved.*

No. 12. Week ending SATURDAY, MARCH 24, 1934. Price 2d. net.

During the week ending 24th March 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 1025 living children, the deaths of 785 persons, and 234 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 715. The equivalent annual birth-rate is 21·2 per thousand, the marriage-rate 4·8, and the death-rate (corrected) 14·8.

The birth-rate of the week is 1·7 more than in the previous week, and 0·3 above the average. The marriage-rate is 0·1 less than in the previous week, and 0·2 below the average. The death-rate is 0·1 less than in the previous week, and 1·6 below the average.

The weekly death-rates in the individual towns varied from 29·5 in Ayr and 18·8 in Kilmarnock, to 5·5 in Falkirk and 7·8 in Motherwell and Wishaw. Relatively high death-rates occurred in Kirkcaldy (18·5), in Paisley (16·0), in Glasgow (15·7), and in Edinburgh (15·5).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 51, and are 14 more than in the previous week. These deaths equal an annual death-rate from these causes of 1·1 per thousand. They include none from typhoid fever, 23 from measles, 5 from scarlet fever, 2 from whooping-cough, 5 from diphtheria, 6 from influenza, 4 from cerebro-spinal fever, and 6 from other epidemic diseases, of which 3 were ascribed to erysipelas, 1 to dysentery, 1 to acute poliomyelitis and 1 to lethargic encephalitis. Compared with the number in the previous week, deaths from measles are 16 more, and from other epidemic diseases 3 more, but those from scarlet fever, whooping-cough and diphtheria each number the same, while from cerebro-spinal fever they are 1 fewer, and from influenza 4 fewer.

Deaths from respiratory diseases numbered 116, and equalled an annual death-rate from these causes of 2·4 per thousand. This death-rate is 0·5 less than in the previous week and is 1·3 below the average.

Deaths of children of less than one year old numbered 91, and those of persons of sixty-five and upwards 268. The former are 17 fewer than in the previous week and the latter are 32 fewer.

Deaths attributed to violent causes numbered 33, and are 16 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 41·6, being 3·9 above that for the previous week, but 1·6 below that for the corresponding week of last year. The mean rainfall was 0·10 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

Births, Deaths, and Marriages

IN THE

Principal Towns of Scotland

*By Authority of the Registrar-General**Crown Copyright Reserved.*

No. 13. Week ending SATURDAY, MARCH 31, 1934. Price 2d. net.

During the week ending 31st March 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 858 living children, the deaths of 761 persons, and 274 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 684. The equivalent annual birth-rate is 17·8 per thousand, the marriage-rate 5·7, and the death-rate (corrected) 14·2.

The birth-rate of the week is 3·4 less than in the previous week, and 2·6 below the average. The marriage-rate is 0·9 more than in the previous week, but 1·3 below the average. The death-rate is 0·6 less than in the previous week, and 1·8 below the average.

The weekly death-rates in the individual towns varied from 24·2 in Kilmarnock and 18·3 in Ayr, to 6·9 in Hamilton, 6·9 in Falkirk and 7·9 in Greenock. Relatively high death-rates occurred in Clydebank (17·1), in Kirkcaldy (16·2), in Aberdeen (15·7), in Glasgow (14·8), and in Edinburgh (14·5).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 58, and are 7 more than in the previous week. These deaths equal an annual death-rate from these causes of 1·2 per thousand. They include none from typhoid fever, 23 from measles, 6 from scarlet fever, 4 from whooping-cough, 11 from diphtheria, 6 from influenza, 1 from cerebro-spinal fever, and 7 from other epidemic diseases, of which 6 were ascribed to erysipelas and 1 to lethargic encephalitis. Compared with the number in the previous week, deaths from diphtheria are 6 more, from whooping-cough 2 more, from scarlet fever 1 more, and from other epidemic diseases 1 more, but those from measles and from influenza each number the same, while from cerebro-spinal fever they are 3 fewer.

Deaths from respiratory diseases numbered 99, and equalled an annual death-rate from these causes of 2·1 per thousand. This death-rate is 0·3 less than in the previous week and is 1·3 below the average.

Deaths of children of less than one year old numbered 86, and those of persons of sixty-five and upwards 276. The former are 5 fewer than in the previous week but the latter are 8 more.

Deaths attributed to violent causes numbered 34, and are 1 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 42·1, being 0·5 above that for the previous week, but 3·6 below that for the corresponding week of last year. The mean rainfall was 0·14 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

WEEKLY RETURN

OF

Births, Deaths, and Marriages

IN THE

Principal Towns of Scotland

*By Authority of the Registrar-General**Crown Copyright Reserved.*

No. 14. Week ending SATURDAY, APRIL 7, 1934. Price 2d. net.

During the week ending 7th April 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 1017 living children, the deaths of 803 persons, and 652 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 740. The equivalent annual birth-rate is 21·1 per thousand, the marriage-rate 13·5, and the death-rate (corrected) 15·3.

The birth-rate of the week is 3·3 more than in the previous week, but 0·2 below the average. The marriage-rate is 7·8 more than in the previous week, and 4·5 above the average. The death-rate is 1·1 more than in the previous week, but 0·5 below the average.

The weekly death-rates in the individual towns varied from 25·3 in Ayr, 17·8 in Coatbridge and 17·8 in Hamilton, to 5·5 in Falkirk and 8·1 in Kilmarnock. Relatively high death-rates occurred in Glasgow (16·8), in Clydebank (16·1), in Greenock (15·7) and in Paisley (15·4).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 62, and are 4 more than in the previous week. These deaths equal an annual death-rate from these causes of 1·3 per thousand. They include none from typhoid fever, 32 from measles, 5 from scarlet fever, 6 from whooping-cough, 9 from diphtheria, 3 from influenza, 3 from cerebro-spinal fever, and 4 from other epidemic diseases, of which 3 were ascribed to erysipelas and 1 to lethargic encephalitis. Compared with the number in the previous week, deaths from measles are 9 more, from whooping-cough 2 more and from cerebro-spinal fever 2 more, but those from scarlet fever are 1 fewer, from diphtheria 2 fewer, from influenza 3 fewer and from other epidemic diseases 3 fewer.

Deaths from respiratory diseases numbered 104, and equalled an annual death-rate from these causes of 2·2 per thousand. This death-rate is 0·1 more than in the previous week but is 1·0 below the average.

Deaths of children of less than one year old numbered 78, and those of persons of sixty-five and upwards 293. The former are 8 fewer than in the previous week but the latter are 17 more.

Deaths attributed to violent causes numbered 26, and are 8 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 40·2, being 1·9 below that for the previous week, and 9·6 below that for the corresponding week of last year. The mean rainfall was 0·71 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

WEEKLY RETURN

OF

Births, Deaths, and Marriages

IN THE

Principal Towns of Scotland

*By Authority of the Registrar-General**Crown Copyright Reserved.*

No. 15. Week ending SATURDAY, APRIL 14, 1934. Price 2d. net.

During the week ending 14th April 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 916 living children, the deaths of 847 persons, and 439 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 794. The equivalent annual birth-rate is 19·0 per thousand, the marriage-rate 9·1, and the death-rate (corrected) 16·4.

The birth-rate of the week is 2·1 less than in the previous week, and 1·8 below the average. The marriage-rate is 4·4 less than in the previous week, but 1·5 above the average. The death-rate is 1·1 more than in the previous week, and 2·2 above the average.

The weekly death-rates in the individual towns varied from 19·2 in Hamilton and 18·7 in Motherwell and Wishaw, to 7·4 in Perth and 11·5 in Dunfermline. Relatively high death-rates occurred in Greenock (18·3), in Glasgow (17·8), in Kirkcaldy (17·4), in Dundee (17·0), and in Falkirk (16·6).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 71, and are 9 more than in the previous week. These deaths equal an annual death-rate from these causes of 1·5 per thousand. They include none from typhoid fever, 49 from measles, 4 from scarlet fever, 8 from whooping-cough, 5 from diphtheria, 3 from influenza, 1 from cerebro-spinal fever, and 1 from lethargic encephalitis. Compared with the number in the previous week, deaths from measles are 17 more and from whooping-cough 2 more, but those from influenza number the same, while from scarlet fever they are 1 fewer, from cerebro-spinal fever 2 fewer, from other epidemic diseases 3 fewer and from diphtheria 4 fewer.

Deaths from respiratory diseases numbered 123, and equalled an annual death-rate from these causes of 2·5 per thousand. This death-rate is 0·3 more than in the previous week but is 0·1 below the average.

Deaths of children of less than one year old numbered 115, and those of persons of sixty-five and upwards 289. The former are 37 more than in the previous week but the latter are 4 fewer.

Deaths attributed to violent causes numbered 27, and are 1 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 41°·5, being 1°·3 above that for the previous week, but 8°·0 below that for the corresponding week of last year. The mean rainfall was 2·59 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

IN THE

Principal Towns of Scotland

*By Authority of the Registrar-General**Crown Copyright Reserved.*

No. 16. Week ending SATURDAY, APRIL 21, 1934. Price 2d. net.

During the week ending 21st April 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 1037 living children, the deaths of 846 persons, and 278 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 797. The equivalent annual birth-rate is 21·5 per thousand, the marriage-rate 5·8, and the death-rate (corrected) 16·5.

The birth-rate of the week is 2·5 more than in the previous week, and 0·5 above the average. The marriage-rate is 3·3 less than in the previous week, and 2·0 below the average. The death-rate is 0·1 more than in the previous week, and 2·4 above the average.

The weekly death-rates in the individual towns varied from 22·5 in Clydebank and 19·5 in Paisley, to 4·3 in Dunfermline and 7·4 in Perth. Relatively high death-rates occurred in Glasgow (19·2), in Hamilton (19·2), in Aberdeen (17·0), and in Falkirk (16·6).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 102, and are 31 more than in the previous week. These deaths equal an annual death-rate from these causes of 2·1 per thousand. They include none from typhoid fever, 61 from measles, 2 from scarlet fever, 8 from whooping-cough, 13 from diphtheria, 7 from influenza, 2 from cerebro-spinal fever, and 9 from other epidemic diseases, of which 7 were ascribed to erysipelas and 2 to lethargic encephalitis. Compared with the number in the previous week, deaths from measles are 12 more, from diphtheria 8 more, from other epidemic diseases 8 more, from influenza 4 more and from cerebro-spinal fever 1 more, but those from whooping-cough number the same, while from scarlet fever they are 2 fewer.

Deaths from respiratory diseases numbered 129, and equalled an annual death-rate from these causes of 2·7 per thousand. This death-rate is 0·2 more than in the previous week and is 0·3 above the average.

Deaths of children of less than one year old numbered 95, and those of persons of sixty-five and upwards 275. The former are 20 fewer than in the previous week and the latter are 14 fewer.

Deaths attributed to violent causes numbered 32, and are 5 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 48°·7, being 7°·2 above that for the previous week, and 5°·9 above that for the corresponding week of last year. The mean rainfall was 0·46 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

No. 17. Week ending SATURDAY, APRIL 28, 1934. Price 2d. net.

During the week ending 28th April 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 936 living children, the deaths of 770 persons, and 430 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 719. The equivalent annual birth-rate is 19·4 per thousand, the marriage-rate 8·9, and the death-rate (corrected) 14·9.

The birth-rate of the week is 2·1 less than in the previous week, and 2·2 below the average. The marriage-rate is 3·1 more than in the previous week, but 1·4 below the average. The death-rate is 1·6 less than in the previous week, but 0·7 above the average.

The weekly death-rates in the individual towns varied from 19·0 in Coatbridge, 18·3 in Greenock and 18·3 in Ayr, to 9·3 in Kirkcaldy and 10·7 in Clydebank. Relatively high death-rates occurred in Falkirk (16·6), in Kilmarnock (16·2), in Glasgow (16·0), in Dundee (15·6) and in Aberdeen (15·4).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 92, and are 10 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 1·9 per thousand. They include none from typhoid fever, 72 from measles, 2 from scarlet fever, 4 from whooping-cough, 7 from diphtheria, 2 from influenza, 3 from cerebro-spinal fever, and 2 from other epidemic diseases, both of which were ascribed to erysipelas. Compared with the number in the previous week, deaths from measles are 11 more, from cerebro-spinal fever 1 more, but those from scarlet fever number the same, while from whooping-cough they are 4 fewer, from influenza 5 fewer, from diphtheria 6 fewer, and from other epidemic diseases 7 fewer.

Deaths from respiratory diseases numbered 101, and equalled an annual death-rate from these causes of 2·1 per thousand. This death-rate is 0·6 less than in the previous week and is 0·3 below the average.

Deaths of children of less than one year old numbered 99, and those of persons of sixty-five and upwards 264. The former are 4 more than in the previous week, but the latter are 11 fewer.

Deaths attributed to violent causes numbered 26, and are 6 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 44·5, being 4·2 below that for the previous week, and 4·5 below that for the corresponding week of last year. The mean rainfall was 0·45 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

No. 18. Week ending SATURDAY, MAY 5, 1934. Price 2d. net.

During the week ending 5th May 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 907 living children, the deaths of 823 persons, and 543 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 764. The equivalent annual birth-rate is 18·8 per thousand, the marriage-rate 11·2, and the death-rate (corrected) 15·8.

The birth-rate of the week is 0·6 less than in the previous week, and 2·5 below the average. The marriage-rate is 2·3 more than in the previous week, and 1·8 above the average. The death-rate is 0·9 more than in the previous week, and 2·1 above the average.

The weekly death-rates in the individual towns varied from 21·4 in Clydebank and 17·8 in Coatbridge, to 11·0 in Falkirk and 12·5 in Motherwell and Wishaw. Relatively high death-rates occurred in Glasgow (17·2), in Greenock (17·0), in Ayr (16·9), in Aberdeen (16·7) and in Perth (16·2).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 106, and are 14 more than in the previous week. These deaths equal an annual death-rate from these causes of 2·2 per thousand. They include none from typhoid fever, 77 from measles, 2 from scarlet fever, 12 from whooping-cough, 9 from diphtheria, 3 from influenza, 2 from cerebro-spinal fever, and 1 from lethargic encephalitis. Compared with the number in the previous week, deaths from whooping-cough are 8 more, from measles 5 more, from diphtheria 2 more, and from influenza 1 more, but those from scarlet fever number the same, while from cerebro-spinal fever they are 1 fewer, and from other epidemic diseases 1 fewer.

Deaths from respiratory diseases numbered 96, and equalled an annual death-rate from these causes of 2·0 per thousand. This death-rate is 0·1 less than in the previous week and is 0·2 below the average.

Deaths of children of less than one year old numbered 109, and those of persons of sixty-five and upwards 278. The former are 10 more than in the previous week, and the latter are 14 more.

Deaths attributed to violent causes numbered 29, and are 3 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 49°·5, being 5°·0 above that for the previous week, and 2°·2 above that for the corresponding week of last year. The mean rainfall was 0·16 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

IN THE

Principal Towns of Scotland

*By Authority of the Registrar-General**Crown Copyright Reserved.*

No. 19. Week ending SATURDAY, MAY 12, 1934. Price 2d. net.

During the week ending 12th May 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 909 living children, the deaths of 744 persons, and 136 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 707. The equivalent annual birth-rate is 18·8 per thousand, the marriage-rate 2·8, and the death-rate (corrected) 14·6.

The birth-rate of the week is the same as in the previous week, but 2·9 below the average. The marriage-rate is 8·4 less than in the previous week, but is the same as the average. The death-rate is 1·2 less than in the previous week, but 0·7 above the average.

The weekly death-rates in the individual towns varied from 23·3 in Hamilton and 22·0 in Kirkcaldy, to 5·7 in Dunfermline and 7·7 in Paisley. Relatively high death-rates occurred in Glasgow (16·8) and in Greenock (15·7).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 84, and are 22 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 1·7 per thousand. They include none from typhoid fever, 57 from measles, 3 from scarlet fever, 3 from whooping-cough, 7 from diphtheria, 2 from influenza, 6 from cerebro-spinal fever, and 6 from other epidemic diseases, of which 4 were ascribed to erysipelas, 1 to dysentery and 1 to lethargic encephalitis. Compared with the number in the previous week, deaths from other epidemic diseases are 5 more, from cerebro-spinal fever 4 more, and from scarlet fever 1 more, but those from influenza are 1 fewer, from diphtheria 2 fewer, from whooping-cough 9 fewer, and from measles 20 fewer.

Deaths from respiratory diseases numbered 100, and equalled an annual death-rate from these causes of 2·1 per thousand. This death-rate is 0·1 more than in the previous week but is the same as the average.

Deaths of children of less than one year old numbered 101, and those of persons of sixty-five and upwards 253. The former are 8 fewer than in the previous week, and the latter are 25 fewer.

Deaths attributed to violent causes numbered 27, and are 2 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 52·7, being 3°·2 above that for the previous week, and 2°·4 above that for the corresponding week of last year. The mean rainfall was 0·64 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

Births, Deaths, and Marriages

IN THE

Principal Towns of Scotland

By Authority of the Registrar-General

Crown Copyright Reserved.

No. 20. Week ending SATURDAY, MAY 19, 1934. Price 2d. net.

During the week ending 19th May 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 923 living children, the deaths of 726 persons, and 121 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 665. The equivalent annual birth-rate is 19·1 per thousand, the marriage-rate 2·5, and the death-rate (corrected) 13·8.

The birth-rate of the week is 0·3 more than in the previous week, but 2·4 below the average. The marriage-rate is 0·3 less than in the previous week, and 0·1 below the average. The death-rate is 0·8 less than in the previous week, but 0·1 above the average.

The weekly death-rates in the individual towns varied from 21·4 in Coatbridge and 17·7 in Greenock, to 4·3 in Dunfermline and 7·3 in Aberdeen. Relatively high death-rates occurred in Paisley (17·1), in Perth (16·2), in Hamilton (15·1), in Glasgow (15·0), in Kirkcaldy (15·0), and in Kilmarnock (14·8).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 85, and are 1 more than in the previous week. These deaths equal an annual death-rate from these causes of 1·8 per thousand. They include none from typhoid fever, 62 from measles, 6 from scarlet fever, 4 from whooping-cough, 6 from diphtheria, 2 from influenza, 1 from cerebro-spinal fever, and 4 from other epidemic diseases, of which 3 were ascribed to erysipelas and 1 to lethargic encephalitis. Compared with the number in the previous week, deaths from measles are 5 more, from scarlet fever 3 more and from whooping-cough 1 more, but those from influenza number the same, while from diphtheria they are 1 fewer, from other epidemic diseases 2 fewer and from cerebro-spinal fever 5 fewer.

Deaths from respiratory diseases numbered 84, and equalled an annual death-rate from these causes of 1·7 per thousand. This death-rate is 0·4 less than in the previous week and is 0·4 below the average.

Deaths of children of less than one year old numbered 66, and those of persons of sixty-five and upwards 218. The former are 35 fewer than in the previous week, and the latter are 35 fewer.

Deaths attributed to violent causes numbered 26, and are 1 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 44°·9, being 7°·8 below that for the previous week, and 6°·5 below that for the corresponding week of last year. The mean rainfall was 1·34 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

WEEKLY RETURN

OF

Births, Deaths, and Marriages

IN THE

Principal Towns of Scotland

*By Authority of the Registrar-General**Crown Copyright Reserved.*

No. 21. Week ending SATURDAY, MAY 26, 1934. Price 2d. net.

During the week ending 26th May 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 954 living children, the deaths of 696 persons, and 151 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 641. The equivalent annual birth-rate is 19·8 per thousand, the marriage-rate 3·1, and the death-rate (corrected) 13·3.

The birth-rate of the week is 0·7 more than in the previous week, but is the same as the average. The marriage-rate is 0·6 more than in the previous week, and 0·3 above the average. The death-rate is 0·5 less than in the previous week, but 0·8 above the average.

The weekly death-rates in the individual towns varied from 20·2 in Kilmarnock and 17·8 in Hamilton, to 6·9 in Falkirk and 7·8 in Motherwell and Wishaw. Relatively high death-rates occurred in Kirkealdy (16·2), in Dundee (14·4), in Dunfermline (14·3) and in Glasgow (14·1).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 79, and are 6 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 1·6 per thousand. They include none from typhoid fever, 47 from measles, 7 from scarlet fever, 12 from whooping-cough, 4 from diphtheria, 3 from influenza, 4 from cerebro-spinal fever, and 2 from other epidemic diseases, of which 1 was ascribed to erysipelas and 1 to lethargic encephalitis. Compared with the number in the previous week, deaths from whooping-cough are 8 more, from cerebro-spinal fever 3 more, from scarlet fever 1 more, and from influenza 1 more, but those from diphtheria are 2 fewer, from other epidemic diseases 2 fewer and from measles 15 fewer.

Deaths from respiratory diseases numbered 60, and equalled an annual death-rate from these causes of 1·2 per thousand. This death-rate is 0·5 less than in the previous week and is 0·8 below the average.

Deaths of children of less than one year old numbered 73, and those of persons of sixty-five and upwards 237. The former are 7 more than in the previous week, and the latter are 19 more.

Deaths attributed to violent causes numbered 27, and are 1 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 50·3, being 5·4 above that for the previous week, but 4·0 below that for the corresponding week of last year. The mean rainfall was 0·29 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

WEEKLY RETURN

OF

Births, Deaths, and Marriages

IN THE

Principal Towns of Scotland

*By Authority of the Registrar-General**Crown Copyright Reserved.*

No. 22. Week ending SATURDAY, JUNE 2, 1934. Price 2d. net.

During the week ending 2nd June 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 932 living children, the deaths of 689 persons, and 239 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 624. The equivalent annual birth-rate is 19·3 per thousand, the marriage-rate 5·0, and the death-rate (corrected) 12·9.

The birth-rate of the week is 0·5 less than in the previous week, and 1·3 below the average. The marriage-rate is 1·9 more than in the previous week, but 0·7 below the average. The death-rate is 0·4 less than in the previous week, but 0·3 above the average.

The weekly death-rates in the individual towns varied from 18·5 in Kirkcaldy and 15·1 in Hamilton, to 8·3 in Paisley and 8·4 in Ayr. Relatively high death-rates occurred in Kilmarnock (14·8), in Glasgow (14·3), in Greenock (13·8) and in Aberdeen (13·3).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 79, and are the same as in the previous week. These deaths equal an annual death-rate from these causes of 1·6 per thousand. They include none from typhoid fever, 48 from measles, 2 from scarlet fever, 9 from whooping-cough, 12 from diphtheria, 2 from influenza, 2 from cerebro-spinal fever, and 4 from other epidemic diseases, of which 3 were ascribed to erysipelas and 1 to dysentery. Compared with the number in the previous week, deaths from diphtheria are 8 more, from other epidemic diseases 2 more and from measles 1 more, but those from influenza are 1 fewer, from cerebro-spinal fever 2 fewer, from whooping-cough 3 fewer and from scarlet fever 5 fewer.

Deaths from respiratory diseases numbered 62, and equalled an annual death-rate from these causes of 1·3 per thousand. This death-rate is 0·1 more than in the previous week but is 0·5 below the average.

Deaths of children of less than one year old numbered 80, and those of persons of sixty-five and upwards 214. The former are 7 more than in the previous week, but the latter are 23 fewer.

Deaths attributed to violent causes numbered 27, and are the same as in the previous week.

The mean temperature for seven of the towns named in the Table was 55°·5, being 5°·2 above that for the previous week, but the same as that for the corresponding week of last year. The mean rainfall was 0·00 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

WEEKLY RETURN

OF

Births, Deaths, and Marriages

IN THE

Principal Towns of Scotland

*By Authority of the Registrar-General**Crown Copyright Reserved.*

No. 23. Week ending SATURDAY, JUNE 9, 1934. Price 2d. net.

During the week ending 9th June 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 980 living children, the deaths of 695 persons, and 733 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 640. The equivalent annual birth-rate is 20·3 per thousand, the marriage-rate 15·2, and the death-rate (corrected) 13·3.

The birth-rate of the week is 1·0 more than in the previous week, but 0·8 below the average. The marriage-rate is 10·2 more than in the previous week, and 3·4 above the average. The death-rate is 0·4 more than in the previous week, and 0·6 above the average.

The weekly death-rates in the individual towns varied from 23·6 in Perth and 21·9 in Hamilton, to 7·9 in Greenock and 8·3 in Falkirk. Relatively high death-rates occurred in Ayr (18·3), in Motherwell and Wishaw (17·9), in Coatbridge (17·8), and in Glasgow (14·3).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 51, and are 28 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 1·1 per thousand. They include none from typhoid fever, 31 from measles, 2 from scarlet fever, 9 from whooping-cough, 7 from diphtheria, 1 from influenza, none from cerebro-spinal fever, and 1 from erysipelas. Compared with the number in the previous week, deaths from scarlet fever and whooping-cough each number the same, but those from influenza are 1 fewer, from cerebro-spinal fever 2 fewer, from other epidemic diseases 3 fewer, from diphtheria 5 fewer, and from measles 17 fewer.

Deaths from respiratory diseases numbered 70, and equalled an annual death-rate from these causes of 1·5 per thousand. This death-rate is 0·2 more than in the previous week but is 0·1 below the average.

Deaths of children of less than one year old numbered 78, and those of persons of sixty-five and upwards 225. The former are 2 fewer than in the previous week, but the latter are 11 more.

Deaths attributed to violent causes numbered 25, and are 2 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 55°·1, being 0°·4 below that for the previous week, and 7°·2 below that for the corresponding week of last year. The mean rainfall was 0·17 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

Births, Deaths, and Marriages

IN THE

Principal Towns of Scotland

*By Authority of the Registrar-General**Crown Copyright Reserved.*

No. 24. Week ending SATURDAY, JUNE 16, 1934. Price 2d. net.

During the week ending 16th June 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 934 living children, the deaths of 638 persons, and 473 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 599. The equivalent annual birth-rate is 19·3 per thousand, the marriage-rate 9·8, and the death-rate (corrected) 12·4.

The birth-rate of the week is 1·0 less than in the previous week, and 1·5 below the average. The marriage-rate is 5·4 less than in the previous week, and 0·8 below the average. The death-rate is 0·9 less than in the previous week, but 0·6 above the average.

The weekly death-rates in the individual towns varied from 15·7 in Greenock and 15·0 in Clydebank, to 2·7 in Kilmarnock and 8·6 in Dunfermline. Relatively high death-rates occurred in Glasgow (13·8), in Perth (13·3), in Coatbridge (13·1) and in Dundee (12·9).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 59, and are 8 more than in the previous week. These deaths equal an annual death-rate from these causes of 1·2 per thousand. They include 3 from typhoid fever, 30 from measles, 5 from scarlet fever, 7 from whooping-cough, 6 from diphtheria, 4 from influenza, none from cerebro-spinal fever, and 4 from other epidemic diseases, of which 2 were ascribed to erysipelas and 2 to lethargic encephalitis. Compared with the number in the previous week, deaths from typhoid fever, scarlet fever, influenza, and other epidemic diseases are each 3 more, but those from measles are 1 fewer, from diphtheria 1 fewer, and from whooping-cough 2 fewer.

Deaths from respiratory diseases numbered 61, and equalled an annual death-rate from these causes of 1·3 per thousand. This death-rate is 0·2 less than in the previous week and is 0·2 below the average.

Deaths of children of less than one year old numbered 62, and those of persons of sixty-five and upwards 229. The former are 16 fewer than in the previous week, but the latter are 4 more.

Deaths attributed to violent causes numbered 24, and are 1 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 58°·2, being 3°·1 above that for the previous week, but 4°·1 below that for the corresponding week of last year. The mean rainfall was 0·23 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

WEEKLY RETURN

OF

Births, Deaths, and Marriages

IN THE

Principal Towns of Scotland

*By Authority of the Registrar-General**Crown Copyright Reserved.*

No. 25. Week ending SATURDAY, JUNE 23, 1934. Price 2d. net.

During the week ending 23rd June 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 905 living children, the deaths of 649 persons, and 461 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 600. The equivalent annual birth-rate is 18·7 per thousand, the marriage-rate 9·6, and the death-rate (corrected) 12·4.

The birth-rate of the week is 0·6 less than in the previous week, and 1·9 below the average. The marriage-rate is 0·2 less than in the previous week, but 0·1 above the average. The death-rate is the same as in the previous week, but 0·6 above the average.

The weekly death-rates in the individual towns varied from 18·0 in Falkirk and 17·4 in Kirkcaldy, to 8·8 in Perth and 9·8 in Ayr. Relatively high death-rates occurred in Coatbridge (15·5), in Motherwell and Wishaw (14·8), in Kilmarnock (13·5) and in Edinburgh (13·2).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 33, and are 26 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·7 per thousand. They include 1 from typhoid fever, 17 from measles, 2 from scarlet fever, 5 from whooping-cough, 3 from diphtheria, none from influenza, 2 from cerebro-spinal fever, and 3 from other epidemic diseases, of which 2 were ascribed to lethargic encephalitis and 1 to erysipelas. Compared with the number in the previous week, deaths from cerebro-spinal fever are 2 more, but those from other epidemic diseases are 1 fewer, from typhoid fever 2 fewer, from whooping-cough 2 fewer, from scarlet fever 3 fewer, from diphtheria 3 fewer and from measles 13 fewer.

Deaths from respiratory diseases numbered 69, and equalled an annual death-rate from these causes of 1·4 per thousand. This death-rate is 0·1 more than in the previous week but is the same as the average.

Deaths of children of less than one year old numbered 49, and those of persons of sixty-five and upwards 245. The former are 13 fewer than in the previous week, but the latter are 16 more.

Deaths attributed to violent causes numbered 26, and are 2 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 55°·9, being 2°·3 below that for the previous week, and 1°·0 below that for the corresponding week of last year. The mean rainfall was 1·28 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

Births, Deaths, and Marriages

IN THE

Principal Towns of Scotland

*By Authority of the Registrar-General**Crown Copyright Reserved.*

No. 26. Week ending SATURDAY, JUNE 30, 1934. Price 2d. net.

During the week ending 30th June 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 916 living children, the deaths of 611 persons, and 563 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 563. The equivalent annual birth-rate is 19·0 per thousand, the marriage-rate 11·7, and the death-rate (corrected) 11·7.

The birth-rate of the week is 0·3 more than in the previous week, but 0·9 below the average. The marriage-rate is 2·1 more than in the previous week, but 0·1 below the average. The death-rate is 0·7 less than in the previous week, but 0·4 above the average.

The weekly death-rates in the individual towns varied from 15·3 in Dundee and 14·8 in Motherwell and Wishaw, to 4·1 in Falkirk and 8·2 in Hamilton. Relatively high death-rates occurred in Greenock (13·8), in Glasgow (11·9), in Coatbridge (11·9), and in Paisley (11·8).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 32, and are 1 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·7 per thousand. They include none from typhoid fever, 13 from measles, 2 from scarlet fever, 7 from whooping-cough, 2 from diphtheria, 1 from influenza, 5 from cerebro-spinal fever, and 2 from other epidemic diseases, both of which were ascribed to erysipelas. Compared with the number in the previous week, deaths from cerebro-spinal fever are 3 more, from whooping-cough 2 more, and from influenza 1 more, but those from scarlet fever number the same, while from diphtheria they are 1 fewer, from other epidemic diseases 1 fewer and from measles 4 fewer.

Deaths from respiratory diseases numbered 40, and equalled an annual death-rate from these causes of 0·8 per thousand. This death-rate is 0·6 less than in the previous week and is 0·5 below the average.

Deaths of children of less than one year old numbered 76, and those of persons of sixty-five and upwards 219. The former are 27 more than in the previous week, but the latter are 26 fewer.

Deaths attributed to violent causes numbered 26, and are the same as in the previous week.

The mean temperature for seven of the towns named in the Table was 57°·4, being 1°·5 above that for the previous week, but 2°·8 below that for the corresponding week of last year. The mean rainfall was 0·25 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

Births, Deaths, and Marriages

IN THE

Principal Towns of Scotland

*By Authority of the Registrar-General**Crown Copyright Reserved.*

No. 27. Week ending SATURDAY, JULY 7, 1934. Price 2d. net.

During the week ending 7th July 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 972 living children, the deaths of 632 persons, and 718 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 584. The equivalent annual birth-rate is 20·1 per thousand, the marriage-rate 14·9, and the death-rate (corrected) 12·1.

The birth-rate of the week is 1·1 more than in the previous week, and 0·4 above the average. The marriage-rate is 3·2 more than in the previous week, and 3·3 above the average. The death-rate is 0·4 more than in the previous week, and 0·1 above the average.

The weekly death-rates in the individual towns varied from 17·4 in Kirkcaldy and 16·2 in Perth, to 6·9 in Falkirk and 7·0 in Ayr. Relatively high death-rates occurred in Coatbridge (15·5), in Hamilton (15·1), in Clydebank (15·0), in Dundee (14·4), in Aberdeen (13·9), in Edinburgh (13·1), and in Greenock (13·1).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 36, and are 4 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·7 per thousand. They include 1 from typhoid fever, 13 from measles, 1 from scarlet fever, 4 from whooping-cough, 5 from diphtheria, 3 from influenza, 5 from cerebro-spinal fever, and 4 from other epidemic diseases, of which 2 were ascribed to erysipelas, 1 to acute poliomyelitis, and 1 to lethargic encephalitis. Compared with the number in the previous week, deaths from diphtheria are 3 more, from influenza 2 more, from other epidemic diseases 2 more and from typhoid fever 1 more, but those from measles and from cerebro-spinal fever each number the same, while from scarlet fever they are 1 fewer and from whooping-cough 3 fewer.

Deaths from respiratory diseases numbered 52, and equalled an annual death-rate from these causes of 1·1 per thousand. This death-rate is 0·3 more than in the previous week but is 0·3 below the average.

Deaths of children of less than one year old numbered 65, and those of persons of sixty-five and upwards 237. The former are 11 fewer than in the previous week, but the latter are 18 more.

Deaths attributed to violent causes numbered 32, and are 6 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 64°·0, being 6°·6 above that for the previous week, but 2°·8 below that for the corresponding week of last year. The mean rainfall was 0·05 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

No. 28. Week ending SATURDAY, JULY 14, 1934. Price 2d. net.

During the week ending 14th July 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 835 living children, the deaths of 585 persons, and 684 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 543. The equivalent annual birth-rate is 17·3 per thousand, the marriage-rate 14·2, and the death-rate (corrected) 11·2.

The birth-rate of the week is 2·8 less than in the previous week, and 2·2 below the average. The marriage-rate is 0·7 less than in the previous week, but 1·5 above the average. The death-rate is 0·9 less than in the previous week, but 0·3 above the average.

The weekly death-rates in the individual towns varied from 17·1 in Clydebank and 16·6 in Falkirk, to 5·4 in Kilmarnock and 5·5 in Hamilton. Relatively high death-rates occurred in Paisley (15·4), in Ayr (14·0), in Perth (13·3), in Aberdeen (12·7), in Dundee (12·3) and in Glasgow (12·2).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 28, and are 8 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·6 per thousand. They include none from typhoid fever, 8 from measles, none from scarlet fever, 9 from whooping-cough, 6 from diphtheria, 3 from influenza, 2 from cerebro-spinal fever, and none from other epidemic diseases. Compared with the number in the previous week, deaths from whooping-cough are 5 more and from diphtheria 1 more, but those from influenza number the same, while from cerebro-spinal fever they are 3 fewer and from measles 5 fewer.

Deaths from respiratory diseases numbered 59, and equalled an annual death-rate from these causes of 1·2 per thousand. This death-rate is 0·1 more than in the previous week and is 0·1 above the average.

Deaths of children of less than one year old numbered 62, and those of persons of sixty-five and upwards 219. The former are 3 fewer than in the previous week, and the latter are 18 fewer.

Deaths attributed to violent causes numbered 29, and are 3 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 63°·9, being 0°·1 below that for the previous week, but 3°·4 above that for the corresponding week of last year. The mean rainfall was 0·76 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

No. 29. Week ending SATURDAY, JULY 21, 1934. Price 2d. net.

During the week ending 21st July 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 941 living children, the deaths of 572 persons, and 939 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 535. The equivalent annual birth-rate is 19·5 per thousand, the marriage-rate 19·5, and the death-rate (corrected) 11·1.

The birth-rate of the week is 2·2 more than in the previous week but 0·1 below the average. The marriage-rate is 5·3 more than in the previous week and 2·5 above the average. The death-rate is 0·1 less than in the previous week and 0·1 below the average.

The weekly death-rates in the individual towns varied from 17·7 in Perth and 16·4 in Motherwell and Wishaw, to 6·5 in Paisley and 7·2 in Greenock. Relatively high death-rates occurred in Dundee (13·8), in Falkirk (13·8), in Kilmarnock (13·5), in Coatbridge (13·1) and in Hamilton (12·3).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 27, and are 1 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·6 per thousand. They include 1 from typhoid fever, 12 from measles, 1 from scarlet fever, 7 from whooping-cough, 4 from diphtheria, none from influenza, 1 from cerebro-spinal fever, and 1 from erysipelas. Compared with the number in the previous week, deaths from measles are 4 more, from typhoid fever 1 more, from scarlet fever 1 more and from other epidemic diseases 1 more, but those from cerebro-spinal fever are 1 fewer, from whooping-cough 2 fewer and from diphtheria 2 fewer.

Deaths from respiratory diseases numbered 50, and equalled an annual death-rate from these causes of 1·0 per thousand. This death-rate is 0·2 less than in the previous week and is 0·3 below the average.

Deaths of children of less than one year old numbered 54, and those of persons of sixty-five and upwards 188. The former are 8 fewer than in the previous week, and the latter are 31 fewer.

Deaths attributed to violent causes numbered 29, and are the same as in the previous week.

The mean temperature for seven of the towns named in the Table was 61°·4, being 2°·5 below that for the previous week, but the same as that for the corresponding week of last year. The mean rainfall was 1·14 inch.

NOTE.—*The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.*

WEEKLY RETURN

OF

Births, Deaths, and Marriages

IN THE

Principal Towns of Scotland

*By Authority of the Registrar-General**Crown Copyright Reserved.*

No. 30. Week ending SATURDAY, JULY 28, 1934. Price 2d. net.

During the week ending 28th July 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 894 living children, the deaths of 526 persons, and 559 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 500. The equivalent annual birth-rate is 18·5 per thousand, the marriage-rate 11·6, and the death-rate (corrected) 10·4.

The birth-rate of the week is 1·0 less than in the previous week and 0·6 below the average. The marriage-rate is 7·9 less than in the previous week but 0·6 above the average. The death-rate is 0·7 less than in the previous week and 0·1 below the average.

The weekly death-rates in the individual towns varied from 18·0 in Falkirk and 16·6 in Coatbridge, to 6·4 in Clydebank and 7·4 in Perth. Relatively high death-rates occurred in Dunfermline (15·8), in Kilmarnock (12·1), in Paisley (11·8), in Dundee (11·7), in Hamilton (11·0) and in Edinburgh (10·6).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 24, and are 3 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·5 per thousand. They include none from typhoid fever, 10 from measles, none from scarlet fever, 6 from whooping-cough, 4 from diphtheria, 1 from influenza, 2 from cerebro-spinal fever, and 1 from erysipelas. Compared with the number in the previous week, deaths from influenza are 1 more and from cerebro-spinal fever 1 more, but those from diphtheria and from other epidemic diseases each number the same, while from whooping-cough they are 1 fewer and from measles 2 fewer.

Deaths from respiratory diseases numbered 49, and equalled an annual death-rate from these causes of 1·0 per thousand. This death-rate is the same as in the previous week but is 0·1 above the average.

Deaths of children of less than one year old numbered 51, and those of persons of sixty-five and upwards 190. The former are 3 fewer than in the previous week, but the latter are 2 more.

Deaths attributed to violent causes numbered 28, and are 1 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 60°·1, being 1°·3 below that for the previous week, and 0°·2 below that for the corresponding week of last year. The mean rainfall was 0·54 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

No. 31. Week ending SATURDAY, AUGUST 4, 1934. Price 2d. net.

During the week ending 4th August 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 833 living children, the deaths of 577 persons, and 417 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 531. The equivalent annual birth-rate is 17·3 per thousand, the marriage-rate 8·6, and the death-rate (corrected) 11·0.

The birth-rate of the week is 1·2 less than in the previous week and 2·1 below the average. The marriage-rate is 3·0 less than in the previous week but 0·1 above the average. The death-rate is 0·6 more than in the previous week and 0·2 above the average.

The weekly death-rates in the individual towns varied from 16·6 in Falkirk and 12·9 in Dunfermline, to 6·2 in Motherwell and Wishaw and 6·7 in Kilmarnock. Relatively high death-rates occurred in Ayr (12·6), in Edinburgh (12·3), in Aberdeen (12·1), in Clydebank (11·8) and in Dundee (11·2).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 29, and are 5 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·6 per thousand. They include none from typhoid fever, 13 from measles, 4 from scarlet fever, 5 from whooping-cough, 4 from diphtheria, 1 from influenza, 1 from cerebro-spinal fever, and 1 from lethargic encephalitis. Compared with the number in the previous week, deaths from scarlet fever are 4 more and from measles 3 more, but those from diphtheria, influenza and other epidemic diseases number the same, while from whooping-cough they are 1 fewer and from cerebro-spinal fever 1 fewer.

Deaths from respiratory diseases numbered 37, and equalled an annual death-rate from these causes of 0·8 per thousand. This death-rate is 0·2 less than in the previous week and is 0·2 below the average.

Deaths of children of less than one year old numbered 49, and those of persons of sixty-five and upwards 219. The former are 2 fewer than in the previous week, but the latter are 29 more.

Deaths attributed to violent causes numbered 25, and are 3 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 60°·4, being 0°·3 above that for the previous week, but 3°·3 below that for the corresponding week of last year. The mean rainfall was 1·41 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

OF

Births, Deaths, and Marriages

IN THE

Principal Towns of Scotland

*By Authority of the Registrar-General**Crown Copyright Reserved.*

No. 32. Week ending SATURDAY, AUGUST 11, 1934. Price 2d. net.

During the week ending 11th August 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 874 living children, the deaths of 551 persons, and 410 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 516. The equivalent annual birth-rate is 18·1 per thousand, the marriage-rate 8·5, and the death-rate (corrected) 10·7.

The birth-rate of the week is 0·8 more than in the previous week but 1·4 below the average. The marriage-rate is 0·1 less than in the previous week but 1·5 above the average. The death-rate is 0·3 less than in the previous week but is the same as the average.

The weekly death-rates in the individual towns varied from 16·2 in Perth and 14·3 in Coatbridge, to 3·2 in Clydebank and 5·5 in Hamilton. Relatively high death-rates occurred in Dundee (14·1), in Ayr (14·0), in Kilmarnock (13·5), in Kirkcaldy (12·7) and in Paisley (12·4).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 18, and are 11 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·4 per thousand. They include none from typhoid fever, 9 from measles, none from scarlet fever, 4 from whooping-cough, 2 from diphtheria, 1 from influenza, 1 from cerebro-spinal fever, and 1 from lethargic encephalitis. Compared with the number in the previous week, deaths from influenza, cerebro-spinal fever and other epidemic diseases each number the same, but those from whooping-cough are 1 fewer, from diphtheria 2 fewer and from measles 4 fewer.

Deaths from respiratory diseases numbered 51, and equalled an annual death-rate from these causes of 1·1 per thousand. This death-rate is 0·3 more than in the previous week but is the same as the average.

Deaths of children of less than one year old numbered 57, and those of persons of sixty-five and upwards 196. The former are 8 more than in the previous week, but the latter are 23 fewer.

Deaths attributed to violent causes numbered 25, and are the same as in the previous week.

The mean temperature for seven of the towns named in the Table was 58°·8, being 1°·6 below that for the previous week, and 0°·5 below that for the corresponding week of last year. The mean rainfall was 0·66 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

Births, Deaths, and Marriages

IN THE

Principal Towns of Scotland

*By Authority of the Registrar-General**Crown Copyright Reserved.*

No. 33. Week ending SATURDAY, AUGUST 18, 1934. Price 2d. net.

During the week ending 18th August 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 841 living children, the deaths of 521 persons, and 362 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 468. The equivalent annual birth-rate is 17·4 per thousand, the marriage-rate 7·5, and the death-rate (corrected) 9·7.

The birth-rate of the week is 0·7 less than in the previous week, and 1·1 below the average. The marriage-rate is 1·0 less than in the previous week but 1·3 above the average. The death-rate is 1·0 less than in the previous week, and 0·5 below the average.

The weekly death-rates in the individual towns varied from 13·5 in Kilmarnock and 12·7 in Kirkcaldy, to 7·0 in Ayr and 7·4 in Perth. Relatively high death-rates occurred in Dundee (11·5), in Aberdeen (11·2) and in Hamilton (11·0).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 21, and are 3 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·4 per thousand. They include none from typhoid fever, 9 from measles, 2 from scarlet fever, 3 from whooping-cough, 5 from diphtheria, none from influenza, 2 from cerebro-spinal fever, and none from other epidemic diseases. Compared with the number in the previous week, deaths from diphtheria are 3 more, from scarlet fever 2 more, and from cerebro-spinal fever 1 more, but those from measles number the same, while those from whooping-cough are 1 fewer.

Deaths from respiratory diseases numbered 38, and equalled an annual death-rate from these causes of 0·8 per thousand. This death-rate is 0·3 less than in the previous week, and is 0·2 below the average.

Deaths of children of less than one year old numbered 42, and those of persons of sixty-five and upwards 183. The former are 15 fewer than in the previous week, and the latter are 13 fewer.

Deaths attributed to violent causes numbered 37, and are 12 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 57°·8, being 1°·0 below that for the previous week, and 2°·0 below that for the corresponding week of last year. The mean rainfall was 0·14 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

Births, Deaths, and Marriages

IN THE

Principal Towns of Scotland

*By Authority of the Registrar-General**Crown Copyright Reserved.*

No. 34. Week ending SATURDAY, AUGUST 25, 1934. Price 2d. net.

During the week ending 25th August 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 802 living children, the deaths of 541 persons, and 374 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 482. The equivalent annual birth-rate is 16·6 per thousand, the marriage-rate 7·7 and the death-rate (corrected) 10·0.

The birth-rate of the week is 0·8 less than in the previous week, and 2·0 below the average. The marriage-rate is 0·2 more than in the previous week and 0·9 above the average. The death-rate is 0·3 more than in the previous week, but 0·7 below the average.

The weekly death-rates in the individual towns varied from 16·2 in Perth and 13·8 in Falkirk, to 5·4 in Clydebank and 6·5 in Paisley. Relatively high death-rates occurred in Kirkcaldy (12·7), in Edinburgh (11·3) and in Dundee (11·2). In Glasgow the rate was (10·1).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 17, and are 4 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·4 per thousand. They include none from typhoid fever, 5 from measles, 2 from scarlet fever, 1 from whooping-cough, 4 from diphtheria, 1 from influenza, 3 from cerebro-spinal fever, and 1 from dysentery. Compared with the number in the previous week, deaths from influenza, from cerebro-spinal fever and from other epidemic diseases are each 1 more, but those from scarlet fever number the same, while from diphtheria they are 1 fewer, from whooping-cough 2 fewer and from measles 4 fewer.

Deaths from respiratory diseases numbered 37, and equalled an annual death-rate from these causes of 0·8 per thousand. This death-rate is the same as in the previous week, but is 0·4 below the average.

Deaths of children of less than one year old numbered 39, and those of persons of sixty-five and upwards 198. The former are 3 fewer than in the previous week, but the latter are 15 more.

Deaths attributed to violent causes numbered 26, and are 11 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 56°·3, being 1°·5 below that for the previous week, and 2°·2 below that for the corresponding week of last year. The mean rainfall was 1·10 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

WEEKLY RETURN

OF

Births, Deaths, and Marriages

IN THE

Principal Towns of Scotland

*By Authority of the Registrar-General**Crown Copyright Reserved.*

No. 35. Week ending SATURDAY, SEPTEMBER 1, 1934. Price 2d. net.

During the week ending 1st September 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 857 living children, the deaths of 548 persons, and 385 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 496. The equivalent annual birth-rate is 17·8 per thousand, the marriage-rate 8·0 and the death-rate (corrected) 10·3.

The birth-rate of the week is 1·2 more than in the previous week, but 0·4 below the average. The marriage-rate is 0·3 more than in the previous week, but 0·1 below the average. The death-rate is 0·3 more than in the previous week, but 0·8 below the average.

The weekly death-rates in the individual towns varied from 16·1 in Clydebank and 15·4 in Ayr, to 6·9 in Kirkcaldy and 7·4 in Perth. Relatively high death-rates occurred in Motherwell and Wishaw (14·8), in Kilmarnock (14·8) and in Paisley (13·0). In Glasgow the rate was (9·7) and in Edinburgh (10·6).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 21, and are 4 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·4 per thousand. They include 1 from typhoid fever, 4 from measles, none from scarlet fever, 5 from whooping-cough, 7 from diphtheria, 3 from influenza, 1 from cerebro-spinal fever, and none from other epidemic diseases. Compared with the number in the previous week, deaths from whooping-cough are 4 more, from diphtheria 3 more, from influenza 2 more and from typhoid fever 1 more, but those from measles are 1 fewer and from cerebro-spinal fever 2 fewer.

Deaths from respiratory diseases numbered 39, and equalled an annual death-rate from these causes of 0·8 per thousand. This death-rate is the same as in the previous week, but is 0·4 below the average.

Deaths of children of less than one year old numbered 42, and those of persons of sixty-five and upwards 194. The former are 3 more than in the previous week, but the latter are 4 fewer.

Deaths attributed to violent causes numbered 20, and are 6 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 55°·0, being 1°·3 below that for the previous week, and 5°·2 below that for the corresponding week of last year. The mean rainfall was 1·22 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

WEEKLY RETURN

OF

Births, Deaths, and Marriages

IN THE

Principal Towns of Scotland

*By Authority of the Registrar-General**Crown Copyright Reserved.*

No. 36. Week ending SATURDAY, SEPTEMBER 8, 1934. Price 2d. net.

During the week ending 8th September 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 845 living children, the deaths of 568 persons, and 557 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 523. The equivalent annual birth-rate is 17·5 per thousand, the marriage-rate 11·5 and the death-rate (corrected) 10·8.

The birth-rate of the week is 0·3 less than in the previous week, and 0·6 below the average. The marriage-rate is 3·5 more than in the previous week, and 1·6 above the average. The death-rate is 0·5 more than in the previous week, and 0·3 above the average.

The weekly death-rates in the individual towns varied from 16·6 in Falkirk and 14·3 in Dunfermline, to 3·6 in Coatbridge and 3·9 in Motherwell and Wishaw. Relatively high death-rates occurred in Kirkcaldy (13·9), in Edinburgh (13·0) and in Dundee (12·0). In Glasgow the rate was 10·7.

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 22, and are 1 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·5 per thousand. They include 1 from typhoid fever, 5 from measles, none from scarlet fever, 4 from whooping-cough, 8 from diphtheria, 4 from influenza, none from cerebro-spinal fever, and none from other epidemic diseases. Compared with the number in the previous week, deaths from measles are 1 more, from diphtheria 1 more and from influenza 1 more, but those from whooping-cough are 1 fewer.

Deaths from respiratory diseases numbered 56, and equalled an annual death-rate from these causes of 1·2 per thousand. This death-rate is 0·4 more than in the previous week, and is 0·1 above the average.

Deaths of children of less than one year old numbered 46, and those of persons of sixty-five and upwards 229. The former are 4 more than in the previous week, and the latter are 35 more.

Deaths attributed to violent causes numbered 17, and are 3 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 56°·0, being 1°·0 above that for the previous week, but 3°·5 below that for the corresponding week of last year. The mean rainfall was 1·12 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

WEEKLY RETURN

OF

Births, Deaths, and Marriages

IN THE

Principal Towns of Scotland

*By Authority of the Registrar-General**Crown Copyright Reserved.*

No. 37. Week ending SATURDAY, SEPTEMBER 15, 1934. Price 2d. net.

During the week ending 15th September 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 808 living children, the deaths of 609 persons, and 472 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 556. The equivalent annual birth-rate is 16·7 per thousand, the marriage-rate 9·8 and the death-rate (corrected) 11·5.

The birth-rate of the week is 0·8 less than in the previous week, and 1·4 below the average. The marriage-rate is 1·7 less than in the previous week, but 1·0 above the average. The death-rate is 0·7 more than in the previous week, and 0·4 above the average.

The weekly death-rates in the individual towns varied from 19·7 in Ayr and 15·6 in Motherwell and Wishaw, to 5·7 in Dunfermline and 5·8 in Kirkcaldy. Relatively high death-rates occurred in Perth (13·3), in Dundee (12·6) and in Coatbridge (11·9). In Glasgow the rate was 11·7 and in Edinburgh 11·8.

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 17, and are 5 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·4 per thousand. They include 1 from typhoid fever, 2 from measles, 1 from scarlet fever, 5 from whooping-cough, 3 from diphtheria, none from influenza, 3 from cerebro-spinal fever, and 2 from other epidemic diseases, of which 1 was ascribed to erysipelas and 1 to lethargic encephalitis. Compared with the number in the previous week, deaths from cerebro-spinal fever are 3 more, from other epidemic diseases 2 more, from scarlet fever 1 more and from whooping-cough 1 more, but those from typhoid fever number the same, while from measles they are 3 fewer and from diphtheria 5 fewer.

Deaths from respiratory diseases numbered 62, and equalled an annual death-rate from these causes of 1·3 per thousand. This death-rate is 0·1 more than in the previous week, and 0·1 above the average.

Deaths of children of less than one year old numbered 67, and those of persons of sixty-five and upwards 247. The former are 21 more than in the previous week, and the latter are 18 more.

Deaths attributed to violent causes numbered 36, and are 19 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 57°·9, being 1°·9 above that for the previous week, and 2°·7 above that for the corresponding week of last year. The mean rainfall was 0·28 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

WEEKLY RETURN

OF

Births, Deaths, and Marriages

IN THE

Principal Towns of Scotland

*By Authority of the Registrar-General**Crown Copyright Reserved.*

No. 38. Week ending SATURDAY, SEPTEMBER 22, 1934. Price 2d. net.

During the week ending 22nd September 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 843 living children, the deaths of 521 persons, and 514 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 466. The equivalent annual birth-rate is 17·5 per thousand, the marriage-rate 10·6 and the death-rate (corrected) 9·7.

The birth-rate of the week is 0·8 more than in the previous week, but 0·8 below the average. The marriage-rate is 0·8 more than in the previous week, and 0·9 above the average. The death-rate is 1·8 less than in the previous week, and 1·0 below the average.

The weekly death-rates in the individual towns varied from 16·2 in Perth and 12·1 in Kilmarnock, to 5·7 in Dunfermline and 6·5 in Paisley. Relatively high death-rates occurred in Ayr (11·2), in Edinburgh (10·7) and in Glasgow (10·0).

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 15, and are 2 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·3 per thousand. They include none from typhoid fever, 2 from measles, 6 from scarlet fever, 1 from whooping-cough, 1 from diphtheria, 1 from influenza, none from cerebro-spinal fever, and 4 from other epidemic diseases, of which 3 were ascribed to erysipelas and 1 to lethargic encephalitis. Compared with the number in the previous week, deaths from scarlet fever are 5 more, from other epidemic diseases 2 more and from influenza 1 more, but those from measles numbered the same, while from diphtheria they are 2 fewer and from whooping-cough 4 fewer.

Deaths from respiratory diseases numbered 60, and equalled an annual death-rate from these causes of 1·2 per thousand. This death-rate is 0·1 less than in the previous week, but is 0·1 above the average.

Deaths of children of less than one year old numbered 45, and those of persons of sixty-five and upwards 195. The former are 22 fewer than in the previous week, and the latter are 52 fewer.

Deaths attributed to violent causes numbered 21, and are 15 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 52°·1, being 5°·8 below that for the previous week, and 4°·2 below that for the corresponding week of last year. The mean rainfall was 0·96 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

OF

Births, Deaths, and Marriages

IN THE

Principal Towns of Scotland

By Authority of the Registrar-General

Crown Copyright Reserved.

No. 39. Week ending SATURDAY, SEPTEMBER 29, 1934. Price 2d. net.

During the week ending 29th September 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 883 living children, the deaths of 574 persons, and 612 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 522. The equivalent annual birth-rate is 18·3 per thousand, the marriage-rate 12·7 and the death-rate (corrected) 10·8.

The birth-rate of the week is 0·8 more than in the previous week, and 0·2 above the average. The marriage-rate is 2·1 more than in the previous week, and 1·7 above the average. The death-rate is 1·1 more than in the previous week, but 0·3 below the average.

The weekly death-rates in the individual towns varied from 21·5 in Dunfermline and 17·0 in Greenock, to 4·3 in Clydebank and 5·5 in Hamilton. Relatively high death-rates occurred in Ayr (14·0), in Aberdeen (13·3) and in Perth (11·8). In Glasgow the rate was 10·5 and in Edinburgh 10·3.

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 11, and are 4 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·2 per thousand. They include none from typhoid fever, 1 from measles, none from scarlet fever, 2 from whooping-cough, 2 from diphtheria, 2 from influenza, 1 from cerebro-spinal fever, and 3 from other epidemic diseases, of which 2 were ascribed to erysipelas and 1 to lethargic encephalitis. Compared with the number in the previous week, deaths from whooping-cough are 1 more, from diphtheria 1 more, from influenza 1 more and from cerebro-spinal fever 1 more, but those from measles are 1 fewer and from other epidemic diseases 1 fewer.

Deaths from respiratory diseases numbered 49, and equalled an annual death-rate from these causes of 1·0 per thousand. This death-rate is 0·2 less than in the previous week, and is 0·3 below the average.

Deaths of children of less than one year old numbered 65, and those of persons of sixty-five and upwards 220. The former are 20 more than in the previous week, and the latter are 25 more.

Deaths attributed to violent causes numbered 25, and are 4 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 54°·2, being 2°·1 above that for the previous week, but 0°·5 below that for the corresponding week of last year. The mean rainfall was 1·25 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

WEEKLY RETURN

OF

Births, Deaths, and Marriages

IN THE

Principal Towns of Scotland

*By Authority of the Registrar-General**Crown Copyright Reserved.*

No. 40. Week ending SATURDAY, OCTOBER 6, 1934. Price 2d. net.

During the week ending 6th October 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 898 living children, the deaths of 579 persons, and 583 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 528. The equivalent annual birth-rate is 18·6 per thousand, the marriage-rate 12·1 and the death-rate (corrected) 10·9.

The birth-rate of the week is 0·3 more than in the previous week, and 0·3 below the average. The marriage-rate is 0·6 less than in the previous week, but 1·8 above the average. The death-rate is 0·1 more than in the previous week, but 0·5 below the average.

The weekly death-rates in the individual towns varied from 15·6 in Motherwell and Wishaw and 15·0 in Kirkcaldy, to 4·8 in Coatbridge and 6·9 in Hamilton. Relatively high death-rates occurred in Aberdeen (14·8), in Dundee (14·1), in Ayr (12·6) and in Paisley (12·4). In Glasgow the rate was 9·5 and in Edinburgh 11·6.

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 14, and are 3 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·3 per thousand. They include none from typhoid fever, 4 from measles, 1 from scarlet fever, 2 from whooping-cough, 6 from diphtheria, 1 from influenza, none from cerebro-spinal fever, and none from other epidemic diseases. Compared with the number in the previous week, deaths from diphtheria are 4 more, from measles 3 more and from scarlet fever 1 more, but those from whooping-cough number the same, while from influenza they are 1 fewer.

Deaths from respiratory diseases numbered 60, and equalled an annual death-rate from these causes of 1·2 per thousand. This death-rate is 0·2 more than in the previous week, but is 0·3 below the average.

Deaths of children of less than one year old numbered 56, and those of persons of sixty-five and upwards 207. The former are 9 fewer than in the previous week, and the latter are 13 fewer.

Deaths attributed to violent causes numbered 19, and are 6 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 50°·7, being 3°·5 below that for the previous week, and 1°·9 below that for the corresponding week of last year. The mean rainfall was 1·31 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

IN THE
Principal Towns of Scotland*By Authority of the Registrar-General**Crown Copyright Reserved.*

No. 41. Week ending SATURDAY, OCTOBER 13, 1934. Price 2d. net.

During the week ending 13th October 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 855 living children, the deaths of 605 persons, and 324 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 569. The equivalent annual birth-rate is 17·7 per thousand, the marriage-rate 6·7 and the death-rate (corrected) 11·8.

The birth-rate of the week is 0·9 less than in the previous week, and 1·2 below the average. The marriage-rate is 5·4 less than in the previous week, and 0·4 below the average. The death-rate is 0·9 more than in the previous week, but 0·2 below the average.

The weekly death-rates in the individual towns varied from 17·7 in Greenock and 15·1 in Hamilton, to 5·4 in Clydedank and 8·1 in Kirkcaldy. Relatively high death-rates occurred in Dunfermline (14·3), in Ayr (14·0), in Dundee (13·8) and in Perth (13·3). In Glasgow the rate was 11·5 and in Edinburgh 12·3.

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 17, and are 3 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·4 per thousand. They include none from typhoid fever, 1 from measles, 3 from scarlet fever, 4 from whooping-cough, 4 from diphtheria, 1 from influenza, 1 from cerebro-spinal fever and 3 from other epidemic diseases, of which 2 were ascribed to erysipelas and 1 to lethargic encephalitis. Compared with the number in the previous week, deaths from other epidemic diseases are 3 more, from scarlet fever 2 more, from whooping-cough 2 more and from cerebro-spinal fever 1 more, but those from influenza number the same, while from diphtheria they are 2 fewer and from measles 3 fewer.

Deaths from respiratory diseases numbered 57, and equalled an annual death-rate from these causes of 1·2 per thousand. This death-rate is the same as in the previous week, but is 0·3 below the average.

Deaths of children of less than one year old numbered 73, and those of persons of sixty-five and upwards 226. The former are 17 more than in the previous week, and the latter are 19 more.

Deaths attributed to violent causes numbered 18, and are 1 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 52°·6, being 1°·9 above that for the previous week, and 1°·1 above that for the corresponding week of last year. The mean rainfall was 0·47 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

No. 42. Week ending SATURDAY, OCTOBER 20, 1934. Price 2d. net.

During the week ending 20th October 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 828 living children, the deaths of 570 persons, and 277 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 524. The equivalent annual birth-rate is 17·2 per thousand, the marriage-rate 5·7 and the death-rate (corrected) 10·9.

The birth-rate of the week is 0·5 less than in the previous week, and 1·2 below the average. The marriage-rate is 1·0 less than in the previous week, but 0·1 above the average. The death-rate is 0·9 less than in the previous week, and 0·9 below the average.

The weekly death-rates in the individual towns varied from 16·6 in Falkirk and 16·4 in Greenock, to 7·0 in Ayr and 8·1 in Kilmarnock. Relatively high death-rates occurred in Perth (16·2), in Hamilton (15·1) and in Coatbridge (11·9). In Glasgow the rate was 10·4 and in Edinburgh 11·7.

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 17, and are the same as in the previous week. These deaths equal an annual death-rate from these causes of 0·4 per thousand. They include 1 from typhoid fever, 2 from measles, 2 from scarlet fever, 6 from whooping-cough, none from diphtheria, 2 from influenza, none from cerebro-spinal fever and 4 from other epidemic diseases, of which 3 were ascribed to erysipelas and 1 to lethargic encephalitis. Compared with the number in the previous week, deaths from typhoid fever are 1 more, from measles 1 more, from scarlet fever 1 fewer, from whooping-cough 2 more, from influenza 1 more and from other epidemic diseases 1 more.

Deaths from respiratory diseases numbered 63, and equalled an annual death-rate from these causes of 1·3 per thousand. This death-rate is 0·1 more than in the previous week, but is 0·2 below the average.

Deaths of children of less than one year old numbered 67 and those of persons of sixty-five and upwards 210. The former are 6 fewer than in the previous week, and the latter are 16 fewer.

Deaths attributed to violent causes numbered 24, and are 6 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 49°·4, being 3°·2 below that for the previous week, but 0°·3 above that for the corresponding week of last year. The mean rainfall was 0·45 inch.

NOTE.—*The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.*

No. 43. Week ending SATURDAY, OCTOBER 27, 1934. Price 2d. net.

During the week ending 27th October 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 855 living children, the deaths of 563 persons, and 330 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 515. The equivalent annual birth-rate is 17·7 per thousand, the marriage-rate 6·8 and the death-rate (corrected) 10·7.

The birth-rate of the week is 0·5 more than in the previous week, but 0·5 below the average. The marriage-rate is 1·1 more than in the previous week, and 0·3 above the average. The death-rate is 0·2 less than in the previous week, and 1·3 below the average.

The weekly death-rates in the individual towns varied from 16·7 in Dundee and 15·2 in Falkirk, to 4·4 in Perth and 4·7 in Motherwell and Wishaw. Relatively high death-rates occurred in Kirkcaldy (15·0), in Hamilton (13·7) and in Clydebank (12·9). In Glasgow the rate was 10·6 and in Edinburgh 10·4.

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 24, and are 7 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·5 per thousand. They include none from typhoid fever, none from measles, 3 from scarlet fever, 3 from whooping-cough, 8 from diphtheria, 3 from influenza, 5 from cerebro-spinal fever and 2 from other epidemic diseases, of which 1 was ascribed to erysipelas and 1 to lethargic encephalitis. Compared with the number in the previous week, deaths from scarlet fever are 1 more, from whooping-cough 3 fewer, from diphtheria 8 more, from influenza 1 more, from cerebro-spinal fever 5 more and from other epidemic diseases 2 fewer.

Deaths from respiratory diseases numbered 65, and equalled an annual death-rate from these causes of 1·3 per thousand. This death-rate is the same as in the previous week, but is 0·4 below the average.

Deaths of children of less than one year old numbered 59 and those of persons of sixty-five and upwards 212. The former are 8 fewer than in the previous week, but the latter are 2 more.

Deaths attributed to violent causes numbered 24, and are the same as in the previous week.

The mean temperature for seven of the towns named in the Table was 46°·9, being 2°·5 below that for the previous week, but 0°·9 above that for the corresponding week of last year. The mean rainfall was 2·15 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

No. 44. Week ending SATURDAY, NOVEMBER 3, 1934. Price 2d. net.

During the week ending 3rd November 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 835 living children, the deaths of 638 persons, and 456 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 592. The equivalent annual birth-rate is 17·3 per thousand, the marriage-rate 9·4 and the death-rate (corrected) 12·3.

The birth-rate of the week is 0·4 less than in the previous week, and 0·8 below the average. The marriage-rate is 2·6 more than in the previous week, and 0·9 above the average. The death-rate is 1·6 more than in the previous week, but 0·4 below the average.

The weekly death-rates in the individual towns varied from 22·5 in Ayr and 16·6 in Coatbridge, to 1·4 in Dunfermline and 3·9 in Motherwell and Wishaw. Relatively high death-rates occurred in Greenock (14·4), in Dundee (13·8), in Hamilton (13·7) and in Glasgow (13·1). In Edinburgh the rate was 11·8.

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 22, and are 2 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·5 per thousand. They include none from typhoid fever, 1 from measles, none from scarlet fever, 5 from whooping-cough, 8 from diphtheria, 3 from influenza, 2 from cerebro-spinal fever, and 3 from other epidemic diseases, of which 2 were ascribed to erysipelas and 1 to lethargic encephalitis. Compared with the number in the previous week, deaths from measles are 1 more, from whooping-cough 2 more, from diphtheria the same, from influenza the same, from cerebro-spinal fever 3 fewer and from other epidemic diseases 1 more.

Deaths from respiratory diseases numbered 77, and equalled an annual death-rate from these causes of 1·6 per thousand. This death-rate is 0·3 more than in the previous week, but is the same as the average.

Deaths of children of less than one year old numbered 83 and those of persons of sixty-five and upwards 237. The former are 24 more than in the previous week, and the latter are 25 more.

Deaths attributed to violent causes numbered 16, and are 8 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 38°·5, being 8°·4 below that for the previous week, and 5°·2 below that for the corresponding week of last year. The mean rainfall was 0·95 inch.

NOTE.—*The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.*

No. 45. Week ending SATURDAY, NOVEMBER 10, 1934. Price 2d. net.

During the week ending 10th November 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 841 living children, the deaths of 721 persons, and 297 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 651. The equivalent annual birth-rate is 17·4 per thousand, the marriage-rate 6·2 and the death-rate (corrected) 13·5.

The birth-rate of the week is 0·1 more than in the previous week, but 0·2 below the average. The marriage-rate is 3·2 less than in the previous week, and 0·4 below the average. The death-rate is 1·2 more than in the previous week, and 0·3 above the average.

The weekly death-rates in the individual towns varied from 15·1 in Hamilton and 14·9 in Edinburgh, to 10·7 in Clydebank and 11·8 in Greenock and in Perth. Relatively high death-rates occurred in Motherwell and Wishaw (14·8), in Coatbridge (14·3), in Ayr (14·0) and in Kirkcaldy (13·9). In Glasgow the rate was 13·2.

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 23, and are 1 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·5 per thousand. They include 1 from typhoid fever, 1 from measles, 2 from scarlet fever, 1 from whooping-cough, 7 from diphtheria, 5 from influenza, 1 from cerebro-spinal fever, and 5 from other epidemic diseases, of which 3 were ascribed to erysipelas and 2 to lethargic encephalitis. Compared with the number in the previous week, deaths from typhoid fever are 1 more, from measles the same, from scarlet fever 2 more, from whooping-cough 4 fewer, from diphtheria 1 fewer, from influenza 2 more, from cerebro-spinal fever 1 fewer, and from other epidemic diseases 2 more.

Deaths from respiratory diseases numbered 84, and equalled an annual death-rate from these causes of 1·7 per thousand. This death-rate is 0·1 more than in the previous week, but is 0·4 below the average.

Deaths of children of less than one year old numbered 68 and those of persons of sixty-five and upwards 282. The former are 15 fewer than in the previous week, but the latter are 45 more.

Deaths attributed to violent causes numbered 31, and are 15 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 39°·9, being 1°·4 above that for the previous week, but 6°·4 below that for the corresponding week of last year. The mean rainfall was 0·50 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

No. 46. Week ending SATURDAY, NOVEMBER 17, 1934. Price 2d. net.

During the week ending 17th November 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 884 living children, the deaths of 815 persons, and 280 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 754. The equivalent annual birth-rate is 18·3 per thousand, the marriage-rate 5·8 and the death-rate (corrected) 15·6.

The birth-rate of the week is 0·9 more than in the previous week, and 0·4 above the average. The marriage-rate is 0·4 less than in the previous week, but 0·8 above the average. The death-rate is 2·1 more than in the previous week, and 2·4 above the average.

The weekly death-rates in the individual towns varied from 23·3 in Hamilton and 22·6 in Coatbridge, to 11·6 in Kirkcaldy and 13·3 in Aberdeen. Relatively high death-rates occurred in Motherwell and Wishaw (18·7), in Ayr (18·3), in Perth (17·7) and in Paisley (17·1). In Glasgow the rate was 16·0 and in Edinburgh 14·1.

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 24, and are 1 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·5 per thousand. They include none from typhoid fever, 1 from measles, none from scarlet fever, 6 from whooping-cough, 3 from diphtheria, 10 from influenza, 1 from cerebro-spinal fever, and 3 from other epidemic diseases, all of which were ascribed to erysipelas. Compared with the number in the previous week, deaths from measles are the same, from whooping-cough 5 more, from diphtheria 4 fewer, from influenza 5 more, from cerebro-spinal fever the same and from other epidemic diseases 2 fewer.

Deaths from respiratory diseases numbered 143, and equalled an annual death-rate from these causes of 3·0 per thousand. This death-rate is 1·3 more than in the previous week, and is 0·9 above the average.

Deaths of children of less than one year old numbered 83 and those of persons of sixty-five and upwards 335. The former are 15 more than in the previous week, and the latter are 53 more.

Deaths attributed to violent causes numbered 33, and are 2 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 39°·7, being 0°·2 below that for the previous week, and 0°·4 below that for the corresponding week of last year. The mean rainfall was 0·12 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

WEEKLY RETURN

OF

Births, Deaths, and Marriages

IN THE

Principal Towns of Scotland

By Authority of the Registrar-General

Crown Copyright Reserved.

No. 47. Week ending SATURDAY, NOVEMBER 24, 1934. Price 2d. net.

During the week ending 24th November 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 880 living children, the deaths of 785 persons, and 278 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 719. The equivalent annual birth-rate is 18·2 per thousand, the marriage-rate 5·8 and the death-rate (corrected) 14·9.

The birth-rate of the week is 0·1 less than in the previous week, and 0·2 below the average. The marriage-rate is the same as in the previous week, and is the same as the average. The death-rate is 0·7 less than in the previous week, but 1·1 above the average.

The weekly death-rates in the individual towns varied from 23·8 in Coatbridge and 19·7 in Kirkcaldy, to 6·9 in Falkirk and 7·2 in Dunfermline. Relatively high death-rates occurred in Hamilton (17·8), in Kilmarnock (17·5), in Perth (16·2) and in Glasgow (15·8). In Edinburgh the rate was 14·4.

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 28, and are 4 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·6 per thousand. They include none from typhoid fever, 1 from measles, 2 from scarlet fever, 5 from whooping-cough, 5 from diphtheria, 11 from influenza, 1 from cerebro-spinal fever, and 3 from other epidemic diseases, of which 2 were ascribed to lethargic encephalitis and 1 to erysipelas. Compared with the number in the previous week, deaths from measles are the same, from scarlet fever 2 more, from whooping-cough 1 fewer, from diphtheria 2 more, from influenza 1 more, from cerebro-spinal fever the same, and from other epidemic diseases the same.

Deaths from respiratory diseases numbered 173, and equalled an annual death-rate from these causes of 3·6 per thousand. This death-rate is 0·6 more than in the previous week, and is 1·2 above the average.

Deaths of children of less than one year old numbered 90 and those of persons of sixty-five and upwards 279. The former are 7 more than in the previous week, but the latter are 56 fewer.

Deaths attributed to violent causes numbered 33, and are the same as in the previous week.

The mean temperature for seven of the towns named in the Table was 45°·3, being 5°·6 above that for the previous week, and 3°·1 above that for the corresponding week of last year. The mean rainfall was 0·13 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

WEEKLY RETURN

OF

Births, Deaths, and Marriages

IN THE

Principal Towns of Scotland

*By Authority of the Registrar-General**Crown Copyright Reserved.*

No. 48. Week ending SATURDAY, DECEMBER 1, 1934. Price 2d. net.

During the week ending 1st December 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 817 living children, the deaths of 801 persons, and 342 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 745. The equivalent annual birth-rate is 16·9 per thousand, the marriage-rate 7·1 and the death-rate (corrected) 15·4.

The birth-rate of the week is 1·3 less than in the previous week, and 1·1 below the average. The marriage-rate is 1·3 more than in the previous week, and 0·5 above the average. The death-rate is 0·5 more than in the previous week, and 2·0 above the average.

The weekly death-rates in the individual towns varied from 26·2 in Coatbridge and 20·7 in Falkirk, to 4·6 in Kirkcaldy and 7·0 in Ayr. Relatively high death-rates occurred in Greenock (20·3), in Paisley (18·3), in Dunfermline (17·2) and in Clydebank (17·1). In Glasgow the rate was 16·8, and in Edinburgh 12·4.

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 34, and are 6 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·7 per thousand. They include none from typhoid fever, 3 from measles, 2 from scarlet fever, 3 from whooping-cough, 5 from diphtheria, 16 from influenza, 2 from cerebro-spinal fever, and 3 from other epidemic diseases, of which 1 was ascribed to erysipelas, 1 to acute poliomyelitis, and 1 to lethargic encephalitis. Compared with the number in the previous week, deaths from measles are 2 more, from scarlet fever the same, from whooping-cough 2 fewer, from diphtheria the same, from influenza 5 more, from cerebro-spinal fever 1 more and from other epidemic diseases the same.

Deaths from respiratory diseases numbered 161, and equalled an annual death-rate from these causes of 3·3 per thousand. This death-rate is 0·3 less than in the previous week, but is 1·0 above the average.

Deaths of children of less than one year old numbered 105 and those of persons of sixty-five and upwards 310. The former are 15 more than in the previous week, and the latter are 31 more.

Deaths attributed to violent causes numbered 26, and are 7 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 47°·4, being 2°·1 above that for the previous week, and 10°·0 above that for the corresponding week of last year. The mean rainfall was 0·41 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

WEEKLY RETURN.

OF

Births, Deaths, and Marriages

IN THE

Principal Towns of Scotland

*By Authority of the Registrar-General**Crown Copyright Reserved.***No. 49. Week ending SATURDAY, DECEMBER 8, 1934. Price 2d. net.**

During the week ending 8th December 1934 there were registered in the Sixteen Principal Towns of Scotland, which collectively have an estimated aggregate population of 2,517,000, the births of 816 living children, the deaths of 395 persons, and 764 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 697. The equivalent annual birth-rate is 16·9 per thousand, the marriage-rate 8·2 and the death-rate (corrected) 14·4.

The birth-rate of the week is the same as that in the previous week, but 1·3 below the average. The marriage-rate is 1·1 more than in the previous week, and 1·0 above the average. The death-rate is 1·0 less than in the previous week, and 0·3 below the average.

The weekly death-rates in the individual towns varied from 22·5 in Clydebank and 21·4 in Coatbridge, to 5·5 in Hamilton and 5·7 in Dunfermline. Relatively high death-rates occurred in Perth (19·2), in Glasgow (16·4) and in Paisley (16·0). In Edinburgh the rate was 12·1.

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 43, and are 9 more than in the previous week. These deaths equal an annual death-rate from these causes of 0·9 per thousand. They include none from typhoid fever, 5 from measles, 2 from scarlet fever, 4 from whooping-cough, 8 from diphtheria, 17 from influenza, 3 from cerebro-spinal fever, and 4 from other epidemic diseases, all of which were ascribed to erysipelas. Compared with the number in the previous week, deaths from measles are 2 more, from scarlet fever the same, from whooping-cough 1 more, from diphtheria 3 more, from influenza 1 more, from cerebro-spinal fever 1 more and from other epidemic diseases 1 more.

Deaths from respiratory diseases numbered 155, and equalled an annual death-rate from these causes of 3·2 per thousand. This death-rate is 0·1 less than in the previous week, but is 0·4 above the average.

Deaths of children of less than one year old numbered 89 and those of persons of sixty-five and upwards 268. The former are 16 fewer than in the previous week, and the latter are 42 fewer.

Deaths attributed to violent causes numbered 27, and are 1 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 44°·6, being 2°·8 below that for the previous week, but 5°·4 above that for the corresponding week of last year. The mean rainfall was 1·24 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

No. 50. Week ending SATURDAY, DECEMBER 15, 1934. Price 2d. net.

During the week ending 15th December 1934 there were registered in the Sixteen Principal Towns of Scotland, those burghs which at the date of the 1931 Census had populations of over 30,000, the births of 821 living children, 332 marriages, and 803 deaths. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 741. The equivalent annual birth-rate is 17·0 per thousand, the marriage-rate 6·9 and the death-rate (corrected) 15·4.

The birth-rate of the week is 0·1 more than in the previous week, but 1·9 below the average. The marriage-rate is 1·3 less than in the previous week, but 1·1 above the average. The death-rate is 1·0 more than in the previous week, and 0·3 above the average.

The weekly death-rates in the individual towns varied from 18·2 in Clydebank and 17·8 in Coatbridge, to 6·9 in Hamilton and 9·8 in Ayr. Relatively high death-rates occurred in Glasgow (17·2), in Dunfermline (17·2), in Paisley (16·6), in Dundee (16·2), and in Kilmarnock (16·2). In Edinburgh the rate was 13·4.

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 56, and are 13 more than in the previous week. These deaths equal an annual death-rate from these causes of 1·2 per thousand. They include none from typhoid fever, 3 from measles, 2 from scarlet fever, 12 from whooping-cough, 5 from diphtheria, 21 from influenza, 2 from cerebro-spinal fever, and 11 from other epidemic diseases, of which 7 were ascribed to erysipelas, 3 to lethargic encephalitis, and 1 to acute poliomyelitis. Compared with the number in the previous week, deaths from measles are 2 fewer, from scarlet fever the same, from whooping-cough 8 more, from diphtheria 3 fewer, from influenza 4 more, from cerebro-spinal fever 1 fewer, and from other epidemic diseases 7 more.

Deaths from respiratory diseases numbered 151, and equalled an annual death-rate from these causes of 3·1 per thousand. This death-rate is 0·1 less than in the previous week, and is 0·2 below the average.

Deaths of children of less than one year old numbered 89 and those of persons of sixty-five and upwards 307. The former are the same as in the previous week, but the latter are 39 more.

Deaths attributed to violent causes numbered 27, and are the same as in the previous week.

The mean temperature for seven of the towns named in the Table was 46°·0, being 1°·4 above that for the previous week, and 10°·4 above that for the corresponding week of last year. The mean rainfall was 0·89 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

OF

Births, Deaths, and Marriages

IN THE

Principal Towns of Scotland

*By Authority of the Registrar-General**Crown Copyright Reserved.***No. 51. Week ending SATURDAY, DECEMBER 22, 1934. Price 2d. net.**

During the week ending 22nd December 1934 there were registered in the Sixteen Principal Towns of Scotland, those burghs which at the date of the 1931 Census had populations of over 30,000, the births of 848 living children, 368 marriages, and 700 deaths. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 650. The equivalent annual birth-rate is 17·6 per thousand, the marriage-rate 7·6, and the death-rate (corrected) 13·5.

The birth-rate of the week is 0·6 more than in the previous week, but 0·9 below the average. The marriage-rate is 0·7 more than in the previous week, and 0·4 above the average. The death-rate is 1·9 less than in the previous week, and 3·0 below the average.

The weekly death-rates in the individual towns varied from 19·7 in Ayr and 17·3 in Dundee, to 6·9 in Kirkcaldy and 7·2 in Dunfermline. Relatively high death-rates occurred in Kilmarnock (16·2), in Greenock (15·7), in Coatbridge (15·5) and in Glasgow (14·6). In Edinburgh the rate was 10·9.

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 43, and are 13 fewer than in the previous week. These deaths equal an annual death-rate from these causes of 0·9 per thousand. They include none from typhoid fever, 3 from measles, 2 from scarlet fever, 14 from whooping-cough, 5 from diphtheria, 12 from influenza, 1 from cerebro-spinal fever, and 6 from other epidemic diseases, of which 5 were ascribed to erysipelas and 1 to lethargic encephalitis. Compared with the number in the previous week, deaths from measles are the same, from scarlet fever the same, from whooping-cough 2 more, from diphtheria the same, from influenza 9 fewer, from cerebro-spinal fever 1 fewer, and from other epidemic diseases 5 fewer.

Deaths from respiratory diseases numbered 136, and equalled an annual death-rate from these causes of 2·8 per thousand. This death-rate is 0·3 less than in the previous week, and is 1·0 below the average.

Deaths of children of less than one year old numbered 90 and those of persons of sixty-five and upwards 245. The former are 1 more than in the previous week, but the latter are 62 fewer.

Deaths attributed to violent causes numbered 24, and are 3 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 43°·5, being 2°·5 below that for the previous week, but 2°·5 above that for the corresponding week of last year. The mean rainfall was 0·57 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.

*By Authority of the Registrar-General**Crown Copyright Reserved.*

No. 52. Week ending SATURDAY, DECEMBER 29, 1934. Price 2d. net.

During the week ending 29th December 1934 there were registered in the Sixteen Principal Towns of Scotland, those burghs which at the date of the 1931 Census had populations of over 30,000, the births of 871 living children, 845 marriages, and 778 deaths. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 721. The equivalent annual birth-rate is 18·0 per thousand, the marriage-rate 17·5, and the death-rate (corrected) 14·9.

The birth-rate of the week is 0·4 more than in the previous week, but 0·4 below the average. The marriage-rate is 9·9 more than in the previous week, but 0·5 below the average. The death-rate is 1·4 more than in the previous week, but 1·3 below the average.

The weekly death-rates in the individual towns varied from 21·0 in Greenock to 11·3 in Dundee (17·3), in Kilmarnock (15·4), in Ayr (15·4). Relatively high death-rates occurred in Glasgow (15·9), and in Coatbridge (15·5). In Edinburgh the rate was 13·7.

Deaths from the principal epidemic diseases, those named in columns 13 to 20 of the Table, numbered 61, and are 18 more than in the previous week. These deaths equal an annual death-rate from these causes of 1·3 per thousand. They include none from typhoid fever, 10 from measles, 3 from scarlet fever, 18 from whooping-cough, 4 from diphtheria, 21 from influenza, 2 from cerebro-spinal fever, and 3 from other epidemic diseases, of which 2 were ascribed to erysipelas and 1 to dysentery. Compared with the number in the previous week, deaths from measles are 7 more, from scarlet fever 1 more, from whooping-cough 4 more, from diphtheria 1 fewer, from influenza 9 more, from cerebro-spinal fever 1 more, and from other epidemic diseases 3 fewer.

Deaths from respiratory diseases numbered 129, and equalled an annual death-rate from these causes of 2·7 per thousand. This death-rate is 0·1 less than in the previous week, and is 0·9 below the average.

Deaths of children of less than one year old numbered 94 and those of persons of sixty-five and upwards 292. The former are 4 more than in the previous week, and the latter are 47 more.

Deaths attributed to violent causes numbered 31, and are 7 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 43°·2, being 0°·3 below that for the previous week, but 3°·1 above that for the corresponding week of last year. The mean rainfall was 1·24 inch.

NOTE.—The averages used for comparison are the means of the same rates in the corresponding weeks of the five preceding years.
